"As a substitute teacher in the schools of San Francisco and South San Francisco since some time in the last millennium (and in Boston before that), Tom Gallagher sees kids on their worst behavior five days a week -- that's when business is good. Once a member of the Massachusetts House of Representatives, where he was affectionately known as Tommy the Commie and sat on the Joint Committee on Education, Gallagher currently holds the line against academic entropy in everything from pre-Kindergarten through 12th

Grade, from Physics to Phys Ed. The fundamental stance of Sub: My Years Underground in America's Schools is wry -- it dares raise questions like why the guy who invented middle schools was never prosecuted for crimes against humanity. At the same time, Gallagher finds much of the current national debate on education misplaced: the system works just fine for some, while for others schools are asked to solve problems in children's lives that are far beyond their scope"--Back cover.

Bibliographies and Literature of Agriculture John Wiley & Sons
#1 New York Times Bestseller from the author of *How to Change Your Mind*, *The Omnivore's Dilemma*, and *Food Rules* Food. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and common sense by confusion--most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With *In Defense of Food*, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: "Eat food. Not too much. Mostly plants." Pollan's bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to eating.
