It

is written from the perspective of a Cosmetic Formulator on the production of the popular cosmetic base known as, Melt and Pour Soap. Whether you are a crafter, hobbyist or business owner this book has everything that you need. This book give you guidance on how, as a small home based business, you can follow the regulations, labeling laws and industry standards for selling soap and cosmetics. My entire journey into the cosmetic industry started with Melt and Pour Soap shortly after I discovered aromatherapy. The roots of our business, Essential Wholesale, all started in December of 1998. Over the years we moved from our home kitchenette to a 600 square foot space, to a 2500 square foot building, to a 10,000 square foot space in a bigger building, and from there we have expanded into 30,000 square feet of that same building. In 2011 our business will be moving to an even larger 58,000 square foot building. As our business expanded we began to focus on natural cosmetics and personal care products. However, I never lost my curiosity and fascination with Melt and Pour Soap. Our relationship with Melt and Pour Soap changed over the years. At first we sold retail customized Melt and Pour Soaps. We then bought and sold the company Critter Soaps. Later we sold thousands of pounds worth of wholesale Melt and Pour Soap base and eventually discontinued selling Melt and Pour Soap because the price kept rising. At the time Melt and Pour Soap was the only cosmetic base we sold that we didn't manufacture ourselves. It simply didn't make sense to wholesale someone else's base when our business model had changed to selling only the bases we manufactured ourselves. It was at this point in our business that I decided it was time to formulate our own Melt and Pour Soap ourselves. It didn't take long to have working formulas, but at that moment we were using up every inch of space in our 30,000 square foot building. We were

bursting at the seams and couldn't accommodate the manufacturing and cooling of the Melt and Pour Soap Base in bulk. Our space was so tight we couldn't possibly cool an 8,000 lb batch of Melt and Pour Soap base into multiple 1 lb, 20 lb and 40 lb blocks to sell in bulk. But we got continued requests to manufacture and sell Melt and Pour Soap base. My solution is this book. I decided to share these basic recipes with you to give you the freedom to make your own Melt and Pour base in the quantities that work best for your business. These recipes will teach you the foundational information that you need and give you tips on how to customize your base.

you ever wondered
why your grocery

going higher every
year, despite you

know that the
laundry detergents

In this day and age,
it is all about saving
money in
whichever way it is
possible. Saving just
a few tens of dollars
every year can turn

out to be a huge saving after a few years. Some of the most expensive grocery items are laundry detergents and soaps. It is not just expensive, but most of the laundry detergents that are available in the market are made using harsh chemicals which will not just damage and spoil the clothes but might also irritate your skin. If you are worried and horrified seeing this amount of money that you spend every month on your laundry detergents, then you can easily get rid of this problem

by preparing your own homemade laundry detergents. The biggest advantage about preparing home based laundry detergents is that they will just cost you in pennies and you will finally save a lot of dollars on your yearly grocery bills. Also, the homemade laundry detergents are natural with no added harsh chemicals and hence they are clothes friendly. A sustainable lifestyle starts in the kitchen with these use-what-you-have, spend-less-money recipes and tips, from the friendly voice behind

@ZeroWasteChef.

In her decade of living with as little plastic, food waste, and stuff as possible, Anne-Marie Bonneau, who blogs under the moniker Zero-

Waste Chef, has learned that "zero-waste" is above all an intention, not a hard-and-fast rule. Because, while one person eliminating all their waste is great, if thousands of people do 20 percent better it will have a much bigger impact on the planet. The good news is you likely already have all the tools you need to begin to create your own change at home, especially in the kitchen. In her debut book, Bonneau gives readers the facts to motivate them to do better, the simple (and usually free) fixes to ease

them into wasting less--you can, for example, banish plastic wrap by simply inverting a plate over your leftovers--and, finally, the recipes and strategies to turn them into more sustainable, money-saving cooks. Rescue a loaf from the landfill by making Mexican Hot Chocolate Bread Pudding, or revive some sad greens to make a pesto. Save five bucks (and the plastic tub) at the supermarket with Yes Whey, You Can Make Ricotta Cheese, then use the cheese in a galette and the

leftover whey to make sourdough tortillas. With 75 vegan and vegetarian recipes for cooking with scraps, creating fermented staples, and using up all your groceries before they become waste--including end-of-recipe tips on what to do with your ingredients next--Bonneau lays out an attainable vision of a zero-waste kitchen. A Guidebook on Homemade Cleaners: DIY Natural Household Cleaners for Beginners Createspace Independent Publishing Platform Traditional household cleaners play a huge factor in this pollution. Synthetic household products contain harmful chemicals that react with ozone from the air, creating toxins like formaldehyde. As an individual you have the power to control most of your choices and, therefore, the impact you create on the environment. Em

bracing a greener lifestyle isn't just about helping to preserve equatorial rain forests, it can also mean improving your health, padding your bank account, and, ultimately, improving your overall quality of life. For instance, Americans do a lot of laundry — about eight loads a week on average, using store-bought detergent adds up. If you'd rather save money, try making your own detergent — it's a fun, easy project, and your laundry will cost only pennies per load. So to sum up... non-toxic cleaners are perfectly safe around children, keep the air you breathe clean, are

much, much cheaper and they don't harm the environment.
