The new Nikon D7200 camera was released to the public on early 2015 and has been deemed a high-end APS-C camera. It has been referred to as the only DX formatted camera currently available on the market and a marginal improvement to the earlier D7100 model. The Nikon Corporation has made every effort to have the device available globally; expanding its reach to users in every area and with every photographic need imaginable. The D7200 has retained the height, weight and dimensions of earlier models in the line but boasts a number of the improved features that include an enhanced internal process, wireless connectivity and video shooting

capabilities. Also included in the features offered by this latest piece of technology is a CMOS sensor with twenty-four point two resolution, a 1.5 times focal-length multiplier, an improved Auto-focus system in the form of the multi-CAM 3500DX II 51 point system with sensitivity of between -3 and -19EV, NFC capabilities, shutter durability of up to 150,000 cycles, wireless flash and improved battery life to sufficiently captured approximately 1,100 shots. The magnesium alloy coated D7200 camera ensures longevity of the new equipment. It is also able to capture shots continuously at approximately 6 frames per second and is equipped with shutter speed capabilities exceeding 1/8000 per second, slot to accommodate two SDXC memory cards and a three point two inch LCD display. The display is designed to include 921,600 dots of resolution and metering sensor. Optical coverage for the D7200 camera is 100%; with the viewfinder offering magnification of 0.94 x 0.63. This aim of this manual is provide users with the pertinent information on setting up and maximizing the features offered by the device. It will identify and elaborate on each feature; effectively expanding the wealth of knowledge that will be available to the D7200 user. History of Nikon Corporation Nikon Corporation is a multinational corporation established in July of 1917 in Tokyo, Japan. The current headquarters for this renowned entity is located Shinagawa in Tokyo, Japan and is believed, as at March 2011, to have approximately 25,000 members of staff in its global employ. The corporation, when first established, was a combination of three of Japan's leading optical manufactures. It was first known as Nippon Kogyo Kabushiki gaisha or Japan Optical Industries Corporation. Name changes followed in 1946 to Nikon and later to the Nikon Corporation in 1988, after the creation and release of its small-sized cameras. Intending to dominate the market from its foundation, the corporation initiated the engineering of optical glass in 1918, marketed its MIKRON 4x and 6x binoculars in 1921 and its JOICO microscope shortly thereafter in 1925. The JOICO was the first ever developed telescope by Nikon and bears the name of the company's first initials. In 1932, the brand name NIKKOR was adopted for the cameras lenses being designed and released globally. The development of cameras followed shortly thereafter with the release of its first small-sized camera; named the Nikon Model 1 in 1948. The company continued its growth; being listed on the Tokyo and Osaka stock exchanges in 1949 and being lauded by the New York Times for its impressive Nikon cameras and NIKKOR lenses in 1950. This global introduction later resulted in the establishment of a NIKKOR club in 152 and the Nikon Optical Co. Inc.; now using the named Nippon Kogaku (U.S.A) Inc. in the United States in 1953. Nikon divisions were later established in Switzerland, the Netherlands, Canada, China, Poland, Thailand, Dubai, Brazil and the United Kingdom; extending the reach of this innovative company. Since its inception, almost a century ago, Nikon continues to revolutionize the field and is now responsible for the production of imaging and optical products globally. A complete guide of how to use the Nikon Z6 and Z7 mirrorless digital cameras (Firmware version 2.20) --- There are myriad things that you can set in the Nikon Z6/Z7 user-interface --- it is simply overwhelming. This guide book shows you how to use use the Nikon Z cameras in a logical, easy-to-follow way. I start with the basic controls of the camera, and then talk basic things such as release modes, exposure, focus, vibration control. Then I talk about white balance and Picture Control the Z cameras offer. I explain

the "i" menu, My Menu, and User Presets U1, U2, U3. I struggled with the User Presets paradigm of the Nikon Z cameras, because the manual is not super-clear about its behavior. So I summarized for you what I was able to understand after some experiments and testing. I also explain some photo techniques such as Multiple exposure, HDR, Interval timer shooting and Time-lapse movie. The complete list of all the menu items are included. I added some shots I made to show you how wonderful the pictures came out to be, all straight from JPEG fine* FX format. I used Nikkor Z 24-70mm f/4 zoom lens, and some other F-mount Nikkor lenses via the FTZ adapter. I also tried a crazy-ultra-wide Voigtlander 10mm M-mount lens via an LM-NZ adapter. Thanks to the short flange distance of the Z-mount, almost any lens in the world can be attached to the Z body via some mount adapters. With the Nikon's introduction of their Z models, we are ushering in the new world of picture-taking -- The Arrival of the Mirrorless Era. You do not need a 500-page photo book to use the Nikon Z cameras. This book shows you how to use the Nikon Z cameras in a logical, easy-to-follow way. Enjoy! In The Nikon Autofocus System, 2nd Edition, photographer Mike Hagen, author of the bestselling The Nikon Creative Lighting System, takes his deep knowledge of Nikon technology and concentrates on its focus features. In this book, which covers all current Nikon DSLR models (including the D5 and D500), Hagen fully explains how Nikon autofocus works, including detailed discussions of all the autofocus modules, drive systems, and camera buttons and menus. He also devotes an entire chapter to explore how focus works with Nikon ' s lenses.

Armed with this general knowledge, Hagen then dives deep and offers camera setups, settings, and best practices for specific field techniques that address the photographic genres that are notoriously challenging for focus: action and sports (indoor and outdoor), wildlife (including birds in flight), and macro photography. He also covers genres such as portrait, landscape, underwater, low-light, and street photography. Hagen not only advises on the best ways to set up the camera and focus systems, he gives helpful tips and tricks throughout the book.

The Nikon Autofocus System also covers:

- Live view autofocus methods and settings
- Achieving great focus in video
- AF tracking
- AF shooting styles, such as back-button AF and shutter-release AF
- HDR, panoramas, and other techniques for shooting with a tripod
- An entire chapter on additional terms and techniques, such as hyperfocal distance, calibrating lenses, focus and flash photography, and more
