A simple approach to weight loss and better health, with an exhaustive (and exhausting) collection of fun, fat-torching, life-changing workouts that can be tailored to any fitness level " This is a must read for everyone who wants to live a long and active life." —Robert Sallis, MD, former president, American College of Sports Medicine What if there were a drug to treat every illness, across all body systems, proven potent against heart disease, depression, arthritis, PMS and erectile dysfunction—even in chronic diseases such as asthma, dementia, and certain types of cancer? What if it had no side effects, was completely free,

readily available, and worked for everyone? Every single person who took it decreased her risk of premature death and raised his quality of life. Would you want it? In a healthcare system that spends 17% of GDP, roughly $2.7 trillion, mostly on disease treatment, how do we save money and prevent illness? By increasing the use of the world's most effective preventive medicine: exercise. In The Exercise Cure, Dr. Jordan Metzl—nationally renowned sports medicine physician—offers malady-specific and well-researched exercise prescriptions to help readers stay healthy, heal disease, drop pounds, increase longevity, and transform their lives. Dr. Metzl knows that exercise is inexpensive, powerful medicine that has benefits in prevention and treatment of disease without disturbing side effects. Even in older adults, daily exercise has been found to prevent dementia by generating neuron development in the hippocampus, the memory center of the brain. Combining the latest data and his proven motivational skills, Dr. Metzl addresses the common maladies troubling millions. He discusses our cardiovascular, pulmonary, metabolic, musculoskeletal, neurologic, reproductive, and endocrinologic body systems, with special sections on sleep problems and cancer prevention, presenting the science behind the role of exercise as medicine. Then, he details workouts that can be tailored easily to any fitness level, beginner to advanced, and provides nutritional information, including meal plans for healthy eating and disease prevention.

How should you grow your organization? Its one of the most challenging questions an executive team faces and the wrong answer can break your firm. So where do you start? By asking the right questions, argue INSEADs Laurence Capron and coauthor Will Mitchell, of Duke Universitys Fuqua School of Business and the Rotman School of Management at the University of Toronto. Drawing on more than two decades of research and teaching, Capron and Mitchell have found that a firms aptitude for determining the best resource pathways for its growth has a defining impact on its success. Theyve come up with a helpful framework, reflecting practices of a variety of successful global organizations, to help you determine which path is best for yours.
