The Nanjing Atrocities:
Crimes of War details the
events unfolding in China and
Japan in the years leading up
to World War II in East Asia
and the Japanese occupation
of the city of Nanjing, China,
in 1937. Following Facing
History's guiding scope and
sequence, and including a
foreword by Benjamin
Ferencz, a war crimes
prosecutor at the Nuremberg
Trials, this resource lays a
broad framework and contains
an in-depth examination of the
war crimes known today as the
Nanjing Atrocities. This book
begins by exploring the impact
of imperialism in East Asia
during the nineteenth and
early twentieth centuries, the
rise of nationalism and
militarism, and how these
developments affected the
complexity of nation building
efforts in China and Japan. It
addresses the brutality of war

and the crimes committed in
Nanjing through an
examination of the choices
made by leaders, soldiers, and
witnesses. The history is
presented through firsthand
accounts and perspectives from
survivors and foreigners living
in Nanjing during the Japanese
occupation. When examining
the aftermath and legacy of the
war in China, readers are asked
to consider the importance of
justice and memory, issues still
relevant today as nations in
East Asia continue to wrestle
with how to remember, teach,
and understand the Nanjing
Atrocities. The Nanjing
Atrocities: Crimes of War is an
invaluable resource for
educators and students of
history seeking an overview of
World War II in East Asia.

examines the events that led to one of the most controversial wars the US has ever known and succinctly explains, for a new generation, why this conflict still matters today.

Southeast Asia Cruising

Guide Routledge

The Physical Geography of Southeast Asia examines the complex mosaic of physical environments which comprise Southeast Asia, and the current environmental problems and management practices which have arisen in this part of the world. The book is in three sections. The first section introduces the basic environmental components (geology, landforms, rivers, vegetation, and others) across the entire region. The second section discusses specific environments that are characteristic of this assemblage of continental and maritime landscapes (volcanic islands, coastal

environment, granitic terrains, karst, etc.). The third and final section illustrates the ecological relationship between the environment and people (volcanic hazards, urban environment, coastal zone development, coral reefs, and others). The physical environment of Southeast Asia is examined at different levels, covering a world region that ranges from ancient, stable landmasses to dynamic, unstable plate boundaries, from aged, primary rainforests to brush, vibrant, resource-demanding built environments. Southeast Asia has been perceived as a laboratory for studying plate tectonics. It is an assemblage of large river basins, peninsulas and archipelagos, and seas surrounded by islands. It is an area of great physical

variations where parts of the physical environment have been significantly degraded anthropogenically, following rapid population growth and development. In large parts of the region, the forms and processes on land and offshore should no longer be seen as entirely natural. As this book repeatedly illustrates, plate tectonics and people are both important contributors to the physical geography of Southeast Asia. The contributors to this volume are distinguished, scholarly, and have a long association with Southeast Asia. The chapters are not only skilfully built on state-of-the-art research findings but also include new material from the on-going research activities of the authors. The book goes beyond being the first comprehensive and detailed volume of the

biophysical geography of Southeast Asia in that it also deals with the tropical environment and the relationship between environment and people in a rapidly developing world region.

Regionalism in Southeast Asia provides the reader with an historical analysis of Southeast Asia from the distinct perspective of regionalism. Southeast Asian history is usually written from a national point of view, which underplays the links between neighbouring states and nations and the effects of these bonds on the development of regionalism. This innovative book begins by defining the meaning of 'region' and 'regionalism' and then applies it to periods in history in Southeast Asia, looking at how patterns of regionalism have shifted through time to the present day. By focusing on the regional perspective Nicholas Tarling gives

an original treatment of Southeast Asian history, its political dynamics and its international realtions. Regionalism in Southeast Asia completes a trilogy of books on Southeast Asia by Nicholas Tarling published by Routledge, the other two are Nationalism in Southeast Asia and Imperialism in Southeast Asia.

Asia in Western and World History: A Guide for Teaching
Routledge

The only guide to Southeast Asia that covers the entire length and breadth of a region frequently visited by round-the-world sailors, many of whom leave Australia to head west. This 2008 edition

concentrates on the most frequented routes and includes the most popular stops. There are hundreds of possible anchorages, the most popular of which are usefully summarised in tables.

Introductory sections cover planning and the last part of the book deals with more general topics including advice on provisioning and the problems that are often faced by cruisers. Stephen Morgan and Elaine Davies first arrived in the region over 30 years ago. They work in Hong Kong- Stephen Davies as Director of the Hong Kong Maritime Museum and Elaine Morgan as a writer and

editor. While this pilot is aimed at yachtsmen and indeed was surveyed from the Davies/Morgan yacht, it is just as relevant to the commercial or military mariner. The part of the world described in this work is one of the most interesting on our planet. Culturally, scenically, climatically and commercially- it has everything. This excellent book - now in its second edition, describes it all very enticingly. Set to the usual high standard of the Imray pilots that precede it, this one is spiced up by the wit and anecdotes the authors are so good at.

linking India to China, identities and premodern East and Southeast Asia can be viewed as a global region in the making over a long period. Intense Asian commerce in spices, silks, and ceramics placed the region in the forefront of global economic history prior to the age of imperialism. Alongside the correlated silver trade among Japanese, Europeans, Muslims, and others, China's age-old tributary trade networks provided the essential stability and continuity enabling a brilliant age of commerce. Though national perspectives stubbornly dominate the writing of Asian history, even powerful state-centric narratives have to be re-examined with respect to shifting contested boundaries. This book situates itself in a new genre of writing on borderland zones between nations, especially prior to the emergence of the modern nation-state. It highlights the role of civilization that developed along with global trade in rare and everyday Asian commodities, raising a range of questions regarding unequal development, intraregional knowledge advances, the origins of globalization, and the emergence of new Asian hybridities beyond and within the conventional boundaries of the nation-state. Chapters range over the intra-Asian trade in silver and ceramics, the Chinese junk trade,

the rise of European trading companies as well as diasporic communities including the historic Japan-towns of Southeast Asia, and many types of technology exchanges. While some readers will be drawn to thematic elements, this book can be read as the narrative history of the making of a coherent East-Southeast Asian world long before the modern period.

By the fourteenth century the Islamic faith had spread via maritime trade routes to Southeast Asia where, over the next

seven hundred years, it would have a continuing influence on political life, social customs, and the development of the arts. Sultans, Shamans, and Saints looks at Islam in Southeast Asia during four major eras: its arrival (to 1300), the first flowering of Islamic identity (1300-1800), the era of imperialism (1800-1945), and the era of independent nation-states (1945-2000). Ranging across the humanities and social sciences, this balanced and accessible work emphasizes the historical development of Southeast Asia's accommodation of Islam and the creation of its distinctive regional character. Each chapter opens with a general

analysis and geopolitical insights, the book paints a bird's eye view of contemporary Southeast Asia as a community of diverse societies and traditions as well as a political theater-of-action nested between India and China and tangled in global economic traffic patterns, balance of powers, and environmental forces. As James R. Rush explains, archaic structures, such as religious and ethnic rivalries, tenacious feudal hierarchies, and age-old trade and migration patterns, remain rooted in today's Southeast Asia beneath the surface of modern national governments. The book draws on a wide range of examples from the major nations, including the ethno-

religious violence in Myanmar, the Muslim-led rebellion in the southern Philippines, the Thai-Cambodian territorial rivalries, the Confucian-inspired governance in Singapore, the military rule and democratization in Indonesia, the environmental consequences of agribusiness, mining, and unchecked urbanization, and the big-power alignments and tensions involving the United States, China, and Japan. By delving into the cultural, political, and geographical background of Southeast Asia, Rush shows that Southeast Asia is unquestionably modern, but it is modern in distinctively Southeast Asian ways.
