Model Rules of Professional Conduct Nelson Thornes

This book introduces the concept of the ‘ native speaker ’ frame: a perceptual

filter within English Language Teaching (ELT) which views the linguistic and

cultural norms and the educational technology of the anglophone West as being

normative, while the norms and practices of non-Western countries are viewed

as deficient. Based on a rich source of ethnographic data, and employing a

frame analysis approach, it investigates the ways in which this ‘ native-

speaker ’ framing influenced the construction and operation of a Japanese

university EFL program. While the program appeared to be free of explicit

expressions of native-speakerism, such as discrimination against teachers, this

study found that the practices of the program were underpinned by implicitly

native-speakerist assumptions based on the stereotyping of Japanese students

and the Japanese education system. The book provides a new perspective on

debates around native-speakerism by examining how the dominant framing of a

program may still be influenced by the ideology, even in cases where overt

signs of native-speakerism appear to be absent.
