Letters Every letter is a new territory for your child. The first step is to get to know the letter and practice through the correct pen guidance by simply tracing it. This is followed by a word containing the letter you have just learned. So your child learns to put the letter in a word. Encourage your child to read the word aloud to directly practice the corresponding sound. Finally, your child learns to write the letter freely and independently. Numbers To understand the meaning of numbers, your child starts counting picture elements. Then, just as with letters, he or she will have to trace the numbers. As soon as they become more confident, free writing follows the number you have just learned, with guidelines ensuring that the number is placed at the correct height.

Most students who are deaf or hard of hearing (DHH) struggle with acquiring literacy skills, some as a direct result of their hearing loss, some because they are receiving insufficient modifications to access the general education curriculum, and some because they have additional learning challenges necessitating significant program modifications. Additionally, instructional practices for DHH students tend to be directed toward two sub-

populations of DHH students: those with useable access to sound and those without. Literacy Instruction for Students who are Deaf and Hard of Hearing describes current, evidence-based practices in teaching literacy for DHH students and provides practitioners and parents with a process for determining whether a practice is or is not "evidence-based." Easterbrooks and Beals-Alvarez describe the importance of the assessment process in providing on-going progress monitoring to document students' literacy growth as a primary means to direct the course of instruction. They address the five key areas of instruction identified by the National Reading Panel: phonemic awareness, phonics, fluency, vocabulary, and comprehension. In this concise guidebook, the authors present the role of assessment in the literacy process, an overview of evidence-based practices, and in the absence of such information, those practices supported by causal factors across the National Reading Panel's five areas of literacy. They also review the evidence base related to writing instruction, present case studies that reflect the diversity within the DHH population, and review the challenges yet to be addressed in deaf education.
