2018 SIBERT MEDALIST LARRY DANE BRIMNER! Here is the story of 19 men from the film industry who were investigated for suspected communist ties during the Cold War, and the 10--known as the Hollywood Ten--who were blacklisted for standing up for their First Amendment rights and refusing to cooperate. World War II is over, but tensions between the communist Soviet Union and the US are at an all-time high. In America,

communist threats are seen everywhere and a committee is formed in the nation's capital to investigate those threats. Larry Dane Brimmer follows the story of 19 men--all from the film industry--who are summoned to appear before the House of Representatives Committee on Un-American Activities. All 19 believe that the committee's investigations into their political views and personal associations are a violation of their First Amendment rights. When

---

the first 10 of these men refuse to give the committee the simple answers it wants, they are cited for contempt of Congress and blacklisted.

The US-Soviet arms race, told through the story of a colorful and visionary American Air Force officer—melding biography, history, world affairs, and science to transport the reader back and forth from individual drama to world stage. "Compulsively readable and important." —The New York Times Book Review In this never-before-told story, Neil

Sheehan—winner of the Pulitzer Prize and the National Book Award -- details American Air Force officer Bernard Schriever's quest to prevent the Soviet Union from acquiring nuclear superiority, and describes American efforts to develop the unstoppable nuclear-weapon delivery system, the intercontinental ballistic missile, the first weapons meant to deter an atomic holocaust rather than to be fired in anger. In a sweeping narrative, Sheehan brings to life a huge cast of

The first full account of how the Cold War arms race finally came to a

close, this riveting narrative history sheds new light on the people who struggled to end this era of massive overkill, and examines the legacy of the nuclear, chemical, and biological weapons that remain a threat today. Drawing on memoirs, interviews in both Russia and the US, and classified documents from deep inside the Kremlin, David E. Hoffman examines the inner motives and secret decisions of each side and details the deadly stockpiles that remained unsecured as the Soviet Union collapsed. This is the fascinating story of how Reagan,

Gorbachev, and a previously unheralded collection of scientists, soldiers, diplomats, and spies changed the course of history.

During the Cold War, freedom of expression was vaunted as liberal democracy 's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called

---

"the most comprehensive account yet of the [CIA 's] activities between 1947 and 1967" by the New York Times, the book presents shocking evidence of the CIA 's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA 's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (The Wall Street Journal), and its story of covert cultural efforts to win hearts and minds continues to be relevant today. Modern World History Macmillan Film Criticism, the Cold War, and the Blacklist examines the long-term reception of several key American films released during the postwar period, focusing on the two main critical lenses used in the interpretation of these films: propaganda and allegory. Produced in response to the hearings held by the House Committee on Un-American Activities (HUAC) that resulted in the Hollywood blacklist, these films ' ideological message and rhetorical effectiveness was often muddled by the inherent difficulties in dramatizing villains defined by their thoughts and belief systems rather than their actions. Whereas anti-Communist propaganda films offered explicit political exhortation, allegory was the preferred vehicle for veiled or hidden political comment in many police procedurals, historical films, Westerns, and science fiction films. Jeff Smith examines the way that particular heuristics, such as the mental availability of exemplars and the effects of framing, have encouraged critics to match filmic elements to contemporaneous historical events, persons, and policies. In charting the development of these particular readings,

Louis Menand offers a new intellectual and cultural history of the postwar years *The Cold War* was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the acclaimed Pulitzer Prize – winning scholar and critic

Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of "freedom" applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even

---

crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his *New Yorker* essays, Menand takes us inside Hannah Arendt's Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage's residencies at North Carolina's Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post-war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and

pop art, Allen Ginsberg's friendship with Lionel Trilling, James Baldwin's transformation into a Civil Rights spokesman, Susan Sontag's challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World

War, but America's once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened. forms—from its potential to evacuate the Liberty Bell from Philadelphia to the plans to launch nuclear missiles from a Boeing-747 jet flying high over Nebraska. Garrett M. Graff sheds light on the inner workings of the 650-acre compound, called Raven Rock, just miles from Camp David, as well as dozens of other bunkers the government built for its top leaders during the Cold War, from the White House lawn to Cheyenne Mountain in Colorado to Palm Beach, Florida, and the secret plans that would have kicked in after a Cold War nuclear attack to

round up foreigners and dissidents and nationalize industries. Equal parts a presidential, military, and cultural history, *Raven Rock* tracks the evolution of the government plan and the threats of global war from the dawn of the nuclear era through the War on Terror. Cold War Yale University Press This book offers a bold re-interpretation of the prevailing narrative that US foreign policy after the Cold War was a failure. In chapters that retell and re-argue the key episodes of the post-Cold War years, Lynch argues that the Cold War cast a shadow on the

presidents that came after it and that success came more from adapting to that shadow than in attempts to escape it. When strategic lessons of the Cold War were applied, presidents fared better; when they were forgotten, they fared worse. This book tells the story not of a revolution in American foreign policy but of its essentially continuous character from one era to the next. While there were many setbacks between the fall of Soviet communism and the opening years of the Trump administration, from Rwanda to 9/11 and Iraq to Syria, Lynch demonstrates that the

The Cold War McGraw-Hill/Glencoe *Contesting History* is an authoritative guide to the positive and negative applications of the past in the public arena and what this signifies for the meaning of history more widely. Using a global, non-Western model, Jeremy Black examines the employment of history by the state, the media, the national collective memory and others and considers its fundamental significance in how we understand the past. Moving from public life pre-1400

to the struggle of ideologies in the 20th century and contemporary efforts to find meaning in historical narratives, *Jeremy Black* incorporates a great deal of original material on governmental, social and commercial influences on the public use of history. This includes a host of in-depth case studies from different periods of history around the world, and coverage of public history in a wider range of media, including TV and film. Readers are guided through this material by an expansive introduction, section headings, chapter conclusions and a

selected further reading list. Written with eminent clarity and breadth of knowledge, *Contesting History* is a key text for all students of public history and anyone keen to know more about the nature of history as a discipline and concept. [Stalin's Library](#) Oxford University Press  
On July 20th, 1969, Neil Armstrong landed gently on the lunar surface and became the first person to set foot on another world. People around the world stopped what they were doing to crowd around television sets and

---

radios to witness one of the greatest achievements in human history—a man walking on the moon. How did we get there? Why haven't we gone back? In *The Space Race: How the Cold War Put Humans on the Moon*, kids ages 12 to 15 explore the race to the moon against the chilling backdrop of the Cold War. The Space Race was the period during and after the Cold War when America and the Soviet Union participated in a fierce competition to see which country could beat the other into

space. It was a time of bitterness, fear, and secrecy, but it was also a moment in history when two countries directed resources toward pushing themselves to reach goals that were once thought unattainable. Would we have succeeded as far as we did without the competition to be first? While Neil Armstrong will be remembered as the first person to set foot on the moon, the people and events behind this accomplishment populate a fascinating tale of politics, science, technology, and teamwork that

resulted in what might be the greatest accomplishment of the twentieth century. In *The Space Race*, middle school students explore this history of science and discover the political, social, and economic factors that led to incredible achievements in space, including the launch of Sputnik, the launch of Explorer I, and eventually, the landing of Apollo 11 on the moon, where Neil Armstrong took those famous first steps. Middle school students will

---

meet some of the tens of thousands of engineers and scientists that worked for years to create the technology needed to send humans to the moon and return them safely to Earth. By showing space events against the backdrop of the turmoil back on Earth, readers understand that scientific achievement doesn't happen in a vacuum, even when it happens in space! A wealth of links to primary sources makes this an interactive learning experience while science-minded

STEAM activities link the historical and scientific material. Throughout the fun facts, cool photos, and investigative projects, kids are encouraged to explore creative and critical thinking and problem-solving strategies. The Space Race is one book in a set of four that explore great events of the twentieth century. Other titles in this set include *Globalization: Why We Care About Faraway Events*; *The Vietnam War*; and *World War II: From the Rise of the Nazi Party to the Dropping of the Atomic Bomb*.

 The Cold War shaped the world we

---

live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and

Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing. The Cold War at Home and Abroad St. Martin's Press Faced with an increasingly formidable anti-ship cruise missile threat from the Soviet Union in the early days of the Cold War, and with the recent memory of

the kamikaze threat from World War II, the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet. The first of these missiles were sizable, necessitating large ships to carry them and their sensors, which resulted in the conversion of a mix of heavy and light cruisers. These ships, tasked with protecting carrier groups and acting as flagships, entered service from 1955 and served until 1980. The cruisers served in the front lines of the Cold War and many saw combat service, engaging in surface

---

actions from Vietnam these cruisers in to the Persian Gulf. Complementing the conventionally-powered missile cruisers was a much smaller number of expensive nuclear-powered cruisers, including the Long Beach, the USN's largest-ever missile cruiser. Until replaced by the Ticonderoga and Burke classes of Aegis ships, the USN's 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War. Using specially commissioned artwork and meticulous research, this illustrated title explores the story of

unparalleled detail, revealing the history behind their development and employment. *The Last Million* Routledge On a warm Saturday night in July 1973 in Bethesda Maryland, a gunman stepped out from behind a tree and fired five point-blank shots into Joe Alon, an unassuming Israeli Air Force pilot and family man. Alon's sixteen-year-old neighbor, Fred Burton, was deeply shocked by this crime that rocked his sleepy suburban neighborhood. As

it turned out, Alon wasn't just a pilot—he was a high-ranking military official and with intelligence ties. The assassin was never found and the case was closed. In 2007, Fred Burton—who had since become a State Department counterterrorism special agent—reopened the case. Here, in *Chasing Shadows*, Burton spins a gripping tale of the secret agents, double dealings, terrorists and heroes he encounters he chases leads around the globe in an effort to solve this

decades-old murder. From swirling dogfights over Egypt and Hanoi to gun battles on the streets of Beirut, this action-packed thriller looks in the dark heart of the Cold War to show power is used, misused, and sold to the most convenient bidder. The Cold War Cold War Era One of the most significant industrial states in the country, with a powerful radical tradition, Pennsylvania was, by the early 1950s, the scene of some of the fiercest anti-Communist

activism in the United States. Philip Jenkins examines the political and social impact of the Cold War across the state, tracing the Red Scare's reverberations in party politics, the labor movement, ethnic organizations, schools and universities, and religious organizations. Among Jenkins's most provocative findings is the revelation that, although their absolute numbers were not large, Communists were very well positioned in crucial

Pennsylvania regions and constituencies, particularly in labor unions, the educational system, and major ethnic organizations. Instead of focusing on Pennsylvania's right-wing politicians (the sort represented nationally by Senator Joseph McCarthy), Jenkins emphasizes the anti-Communist activities of liberal politicians, labor leaders, and ethnic community figures who were terrified of Communist encroachments on their respective power bases. He also stresses the

---

deep roots of the  
state's militant anti-  
Communism,  
which can be traced  
back at least into  
the 1930s.
