*Self-Reliance* Simon and Schuster

New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The

---

American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? These Truths tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of presidents

and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," These Truths observes. "It can't be shirked. There's nothing for it but to get to know it." *The Modern World* Lulu.com

In *Self-Reliance*, Emerson expounds on the importance of trusting your soul, as well as divine providence, to carve out a life. The opening scene is a hiring hall where a union leader (obviously in the pay of the bosses) is trying to convince a committee of workers (who are waiting for their leader, Lefty, to arrive) not to strike. This is followed by a moving confrontation between a discouraged taxi driver, who cannot earn enough to live on, and his angry wife, who wants him to show some backbone and stand up to his employer; a revealing scene between a scheming boss and the young worker who refuses to spy on his fellow employees; a

sad/funny episode centering on a young cabbie and his would-be bride, who lack the wherewithal to get married; a disturbing scene involving a senior doctor and the underpaid young intern (a labor activist) whom the doctor has been ordered to discharge; and, finally, a return to the union hall where the workers, learning that Lefty has been gunned down by the powers-that-be, resolve at last to stand up for their rights and to strike-and to stay off their jobs until their grievances are finally heard and acted upon by those who have so cynically exploited and misused them.

Why was George Washington dismayed by the outcome of the American Revolution? Would slavery still exist if the South had not seceded from the Union in 1861? Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912? History is full of contingencies. People confront problems and debate options for solving them. Then they make a choice and face the consequences of their choice. Often they wonder if a different

choice might have been better. Was the American Revolution a mistake? Was racial segregation inevitable? Was the Cold War necessary? Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices. This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us. It demonstrates a method of teaching history that recreates events as people experienced them, and asks important questions that troubled them but that rarely appear in conventional textbooks. Unlike conventional methods that often reduce history to names, dates and factoids for students to memorize, it is a method that brings past debates to life, the losers' as well as the winners' points of view, and makes the subject exciting. In studying history as choice, students examine the problems people faced, their options for solving them, their decision-making processes, and the choices they made. Then

students evaluate the consequences of those choices both for people in the past and us today. They explore what might have happened if different choices had been made. Finally, students relate the consequences of those past choices to problems we face today and the choices we need to make. History as choice is a practical and practicable method. It has been designed to satisfy the curriculum goals of the National Council for the Social Studies, and the book explains how it can be used to satisfy any state or local curriculum standards. The book also identifies and illustrates resources that can be used with this method -- from data bases to popular music -- and explains how teachers can gradually integrate it into their courses. In the first part of the book, the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point. The second part of the book explores thirteen other questions about significant issues and events in American

history as additional examples of how one might teach history as choice.

They rowed hard, away from the battleships and the bombs. Water sprayed over them. The rowboat pitched one way and then the other. Then, before his eyes, the Arizona lifted up out of the water. That enormous battleship bounced up in the air like a rubber ball and split apart. Fire burst out of the ship. A geyser of water shot into the air and came crashing down. Adam was almost thrown out of the rowboat. He clung to the seat as it swung around. He saw blue skies and the glittering city. The boat swung back again, and he saw black clouds, and the Arizona, his father's ship, sinking beneath the water. -- from *A Boy at War* "He kept looking up, afraid the planes would come back. The sky was obscured by black smoke....It was all unreal: the battleships half sunk, the bullet holes in the boat, Davi and Martin in the water." December 7, 1941: On a quiet Sunday morning,

while Adam and his friends are fishing near Honolulu, a surprise attack by Japanese bombers destroys the fleet at Pearl Harbor. Even as Adam struggles to survive the sudden chaos all around him, and as his friends endure the brunt of the attack, a greater concern hangs over his head: Adam's father, a navy lieutenant, was stationed on the USS Arizona when the bombs fell. During the subsequent days Adam -- not yet a man, but no longer a boy -- is caught up in the war as he desperately tries to make sense of what happened to his friends and to find news of his father. Harry Mazer, whose autobiographical novel, *The Last Mission*, brought the European side of World War II to vivid life, now turns to the Pacific theater and how the impact of war can alter young lives forever.
