university so that it helps students to learn, as well as judging their achievement? How can students be prepared for assessment, including peer, self and group assessment? This book provides comprehensive practical guidance on managing and improving assessment within higher education. It tackles all stages in the assessment cycle including:

- Assessment design
- Preparing students for assessment
- Marking and moderation
- Providing feedback
- Quality assurance

It also provides a concise introduction to the research literature on assessment which will inform practice, debate, programme enhancement and practitioner research within university departments, teaching teams and courses for higher education teachers. The practical guidance in the book is substantiated with reference to relevant research and policy. In particular, it considers how the different purposes of assessment create conflicting demands for staff; often characterised by the tension between attempting to support student learning whilst meeting imperatives for quality assurance and demonstrable maintenance of standards. Issues are debated using concrete examples and workable solutions are illustrated. Consideration is also given to the management of assessment as well as to how new technologies might be used to develop assessment methods and enhance student

learning. Developing Effective Assessment in Higher Education is key reading for both new and experienced lecturers, programme leaders and academic developers, and will enhance their efforts to use assessment to improve students' learning as well as to grade them fairly, reliably and efficiently.

A Practical Guide to

Career Learning and Development
Routledge
Considering part-time study? If so, then this is the book for you! Managing Part-time Study is perfect for the increasing number of students who are considering, or taking, academic courses part-time, whether at postgraduate or undergraduate level. It offers the kind of advice and encouragement that part-time students find difficult to source elsewhere, by recognizing that many of the challenges confronting them are unique to their situation. For example, problems can include the stress of combining study with family or work commitments,

alongside pressures caused by studying over a prolonged period. In response to these issues, the book offers part-time students strategies to:

- Manage their own learning
- Sustain their motivation and keep going
- Prioritize the competing demands on their time
- Anticipate the challenges which they will encounter

Managing Part-time Study provides the most appropriate solutions to frequently encountered situations and offers advice and 'real life' experiences from other part-time students. The book draws upon up-to-date research and also upon Caroline Gatrell's own experience both of teaching part-time students, and of being a part-time student

herself.
