"This book is divided into three main sections. The first section, Foundations of Direct Observation, is intended to provide readers with the basic conceptual foundations of direct observation. We review the basic considerations involved in conducting school-based observations (Chapter 2), describe the most important indicators of high-quality observation methods (Chapter 3), and suggest guidelines for maximizing the reliability and validity of decisions based on observation data (Chapter 4). The second section, Specific Observational Codes, then moves from a general discussion of the overall assessment method to a more specific discussion of extant codes that are available for specific purposes. A number of evidence-based observation codes that were designed to assess student behavior in classroom settings (Chapter 5), the classroom environment (Chapter 6), student behavior in non-classroom settings (Chapter 7), and both student behavior the environmental context within functional assessment (Chapter 8) are introduced. We provide general guidelines for developing a unique code in Chapter 9, as well as a library of operational definitions and a range of sample coding forms within the appendices. The third and final section, Using Assessment Data to Inform Decision Making and Intervention, consists of one chapter focused on what to do once observational data have been collected"--

Moving Beyond Best Practice RTI Press

In the movement toward standards-based education, an important question stands out: How will this reform affect the 10% of school-aged children who have disabilities and thus qualify for special education? In Educating One and All, an expert committee addresses how to reconcile common learning for all students with individualized education for "one"--the unique student. The book makes recommendations to states and communities that have adopted standards-based reform and that seek policies and practices to make reform consistent with the requirements of special education. The committee explores the ideas, implementation issues, and legislative initiatives behind the tradition of special education for people with disabilities. It investigates the policy and practice implications of the current reform movement toward high educational standards for all students. Educating One and All examines the curricula and expected outcomes of standards-based education and the educational experience of students with disabilities--and identifies points of alignment between the two areas. The volume documents the diverse population of students with disabilities and their school experiences. Because approaches to assessment and accountability are key to standards-based reforms, the committee analyzes how assessment systems currently address students with disabilities, including testing accommodations. The book addresses legal and resource implications, as well as parental participation in children's education.
