This book is a practical guide for students who need help in progressing from the decision to write a dissertation to the planning, writing and defending of it. It includes samples of proposals and dissertations that have been accepted and data drawn from a number of sources, including focus groups with doctoral students and graduates and responses to an open-ended questionnaire from doctoral students across the United States. - Publisher.

[An Integrative Approach](#) Barrons Educational Series

The article-based thesis is becoming increasingly common, especially in the 'hard' sciences such as biology, medicine and technology, and is beginning to replace the traditional monograph. Format guidelines vary among universities. This is the first book to summarise the main features, showing the PhD student how to prepare a thesis in such a format. The suggestions are highly practical; both its good and bad examples from published theses support the author's wise advice on all aspects of such theses. Poor figures are not only scrutinised in detail but also redrawn for comparison. Guidance also covers the issues of reprint permissions and copyright. This informative and accessible book, from the author of *How to Write and Illustrate a Scientific Paper*, has been developed through the author's extensive teaching experience in scientific writing and also his experience as a journal editor. It is therefore an indispensable guide to article-based thesis success.

[Writing Dissertations and Theses in Psychology](#) St. Martin's Griffin

A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers. Professional doctorates such as the Doctor of Nursing Practice (DNP), Doctor of Education (EdD), Doctor of Pharmacy (PharmD), Doctor of Professional Studies (DProf or DPS), and the Doctor of Psychology (PsyD) are, in fact, just a few of the professional doctorates being offered today. Professional doctorates are the fastest growing segment of doctoral education. The nature of the dissertation and the process of completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations. This book was written specifically for students and faculty involved in professional practice dissertation work. It addresses both the tasks and procedures that professional practice dissertations have in common with dissertations in "research" doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs. For example, negotiating entry into applied settings and securing the cooperation of practicing professionals is covered, as are alternative models for the dissertation (e.g., the "three article dissertation" or "TAD"). The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research. This book, written by three experienced mentors of professional practice dissertation students, is the comprehensive guide for both students and faculty.

A Practical and Comprehensive Guide to Planning, Writing, and Defending Your Dissertation Corwin Press

This third edition has been well revised and continues with the ideas expressed in the previous two editions. The details and reactions in light of experiences of the intervening years have been updated and expanded. This particularly interesting book is written from a student advocacy perspective, intended to speak to non-traditional students as well as those typical of past generations. Specific topics include: (1) how doctoral study differs from previous pursuits; (2) choosing a dissertation topic; (3) your chair, your committee, and you; (4) writing the proposal; (5) the dissertation; (6) defense of the thesis; and (7) spouses, family and friends. From the Preface: "Looking back upon my academic career, one of the memories that brings me the most pleasure are the words students used to pass along to each other, 'If you have a problem, go see Peggy Hawley.' My distress at seeing bright students drop out and my interest in social science research combined to provide the impetus for writing this book. On a year-long sabbatical leave I interviewed hundreds of doctoral students and dozens of professors across the nation. Then as professor emeritus, I finally found the time to put my thoughts into words" In making the unwritten rules of doctoral study more explicit, the author has attempted to be insightful rather than scientific, personal rather than objective, and practical rather than theoretical. This guide will therefore help to pave the way for those recipients who will pursue and capture academe's highest award: the terminal degree in a particular field of study.

Expert writing advice from the editor of the Boston Globe best-seller, *The Writer's Home Companion* Dissertation writers need strong, practical advice, as well as someone to assure them that their struggles aren't unique. Joan Bolker, midwife to more than one hundred dissertations and co-founder of the Harvard Writing Center, offers invaluable suggestions for the graduate-student writer. Using positive reinforcement, she begins by reminding thesis writers that being able to devote themselves to a project that truly interests them can be a pleasurable adventure. She encourages them to pay close attention to their writing method in order to discover their individual work strategies that promote productivity; to stop feeling fearful that they may disappoint their advisors or family members; and to tailor their theses to their own writing style and personality needs. Using field-tested strategies she assists the student through the entire thesis-writing process, offering advice on choosing a topic and an advisor, on disciplining one's self to work at least fifteen minutes each day; setting short-term deadlines, on revising and defing the thesis, and on life and publication after the dissertation. Bolker makes writing the dissertation an enjoyable challenge.

Designing and writing a qualitative dissertation methodology chapter can

be done! *Qualitative Dissertation Methodology: A Guide for Research Design and Methods* functions as a dissertation advisor to help students construct and write a qualitative methodological framework for their research. Drawing from the challenges author Nathan Durdella has experienced while supervising students, the book breaks down producing the dissertation chapter into smaller pieces and goes through each portion of the methodology process step by step. With a warm and supportive tone, he walks students through the process from the very start, from choosing chairs and developing qualitative support networks to outlining the qualitative chapter and delving into the writing. By the end of the book, students will have completed the most challenging chapter of a qualitative dissertation and laid a strong foundation for the rest of their dissertation work.
