Abstract. The American Academy of
Periodontology offers the following
Guidelines for Periodontal Therapy.
These guidelines are intended to fulfill
the Academy's obligation to the public
and to the dental profession to set forth
the clinical objectives and scope of
periodontal therapy. They also are

designed to give guidance to state
legislatures and agencies that regulate
the practice of periodontology and
should be considered in their entirety.

AAP treatment guidelines stress that
periodontal health should be achieved in the
least invasive and most cost-effective manner.
This is often accomplished through non-
surgical periodontal treatment. Non-surgical
periodontal treatment does have its limitations.
When it does not achieve periodontal health,
surgery may be indicated to restore
periodontal health.
