[Amp Trouble? Try These 9 Simple Solutions](#) First

Try a new rectifier tube. Try plugging in a guitar cable, turn up all the amp's volume, gain and master volume controls up a little and touch the tip of the guitar cable's other end. You should hear loud noise. If you hear noise jump to The amp shows signs of life but does not put out any guitar audio. [BLACKSTAR FLY 3 OWNER'S MANUAL Pdf Download | ManualsLib](#)

Take any guitar cable (short effects jumpers work

best) and "jump" the loop—plug one end into the send jack and one into the return jack. If the amp begins to operate, then the problem could be dirty contacts in one of the jacks. Spray a bit of electronic contact cleaner into each jack (I prefer with lubricant, if possible).

[Guitar Amplifier Repair - iFixit: The Free Repair Manual](#)

It is recommended that you unplug the amp and let it sit for at least 15 minutes to allow any charged components to discharge. It is also recommended that you wear some sort of rubber glove for extra protection. Please be sure to have the amplifier turned off and unplugged when touching anything inside the amp.
