For believers and skeptics alike, *A Doubter's Guide to World Religions* introduces the five major world religions so that you can explore their similarities and differences in a fair and engaging way. The world is a very religious place. Wherever

you look, people are worshipping, praying, believing, following, even dying for their faith. But what does it mean to be religious? Are all religions the same? Do they all call on the same God simply using different names? Are their beliefs and practices simply cultural expressions of the same spiritual longings? Written by historian and theologian John Dickson in his characteristically engaging style, this book presents each of the world's five major systems of faith, carefully outlining the history, doctrines, beliefs, and spiritual practices of: Hinduism ("The Way of Release") Buddhism ("The Way of Enlightenment") Judaism ("The Way of the

Torah") Christianity ("The Way of the Christ") Islam ("The Way of Submission") In his own words, Dickson acts as an art curator in a gallery, presenting each of these "works of art" in their best light and letting each have their say. Along the way, he demonstrates the importance of religion in general—to society and to individual believers—and addresses many of the universal questions that all of these serious and ancient religions ask: Who are we? What is our worth? How should we live? Are we alone? At the end of each section is a bibliography of helpful books and websites for those who are interested in learning even more.

Enhancing Competency of Teachers is a fundamental teaching-and-learning guide. Its main goal is to learn and develop an enhanced value system (EVS) and practice it in everyday life. Filipinos are known worldwide for being friendly and hospitable. However, without limitations, these traits become the roots of corruption in all sectors of Philippine life. This book outlines the sequence of logical modules in teaching-and-learning enhancement programs (TLEP) in the school settings. It is designed for learners in all educational levels, to enhance competencies and effectiveness in human resource development and training. It contains concepts, principles, and strategies for effective teaching and learning. The Ethico-Moral Theory in Learning provides five sets of significant rules in learning ethicomoral values to become genuine professionals. Verily, the skill, method, and social competencies of a person are not enough. They must be supported by a quality EVS that will guide the person to think, feel, and act-with strict reverence to the will of God. Many books contained different insights, theories, philosophies, principles, and concepts in teaching and learning that sometimes confused readers in understanding how to learn or teach productively. In contrast, this text is presented in a very simple and logical manner. It advocates for the need of educational change, using EVS as the key. It presents simple approach in designing, implementing, and managing TLEP in school settings. It covers elementary modules-i.e., Learning

Process; Teaching Methods/ Techniques/ Strategies; Preparing Daily Lesson; Sequence of Instruction; Selection of Teaching Aids; Speech Techniques; Questioning Techniques; Learning Distractions; Evaluation Techniques, Review/Summary/Reinforcement. Verily, a high school graduate can become a very productive professional through reading this book seriously. Today, the main cause of poverty is corruption. Poverty creates hunger. Hunger results to crimes. Criminal acts are indicators of degraded ethicomoral values. To have More Fun in the Philippines, EVS is a must amongst Filipino people! Enhancing Competency of Teachers John Wiley & Sons Over 20,000 words, including the most common words. Definitions explanatory and presented in simple language. The violin was first mentioned in a book in the sixteenth century. An abundant and diverse literature on the instrument has grown since then, and a complete general guide to these materials has not been produced in the modern era. The last, Edward Heron-Allen's *De Fidiculis Bibliographia*, was published in 1894. This

book fills that void, organizing and annotating information on the violin from a variety of fields and sources. It provides a comprehensive, though selective, guide to all facets of the instrument. The book is divided into 4 main parts: Reference and General Studies; Acoustics and Construction; Violin Playing, Performance Practice, and Music; and Violinists, Composers, and Violin Teachers. It will serve as a ready reference for students and scholars, and is a welcome addition to the esteemed Routledge Music Bibliography series.

Education in Ancient Rome (1977) examines the development, structure and role of education from the third century B.C. to the time of Trajan, a period which saw great changes in Roman society. It provides a historical background, showing the effects upon the educational system of Rome's transition from an agricultural community to a great metropolis, tracing the development of primary, grammar and rhetoric schools, and discussing the standards of upbringing and education. The book then looks at the physical conditions of teaching – accommodation, equipment, discipline, the economic position of teachers, the fee-paying system, and the part played by the Roman State. Finally, it gives a full appraisal of the standard Roman teaching programme.
