The great classic work, A Course in Miracles, is devoted to teachings about who we are, our relationships to God and with each other, and the actually mental nature of our bodies and the world. There are three constituent parts to the Course: The Text, a Workbook for Students, and the Manual for Teachers. The Text lays out the theoretical foundation for the metaphysical system of the Course. The Workbook contains a series of 365 Lessons to be practiced daily for the purpose of retraining the mind and healing our perception. Finally, the Manual contains information for and about advanced teachers of God. A

Course in Miracles is also about miracles, which students understand to be, in part, a shift in perception to healed vision. But miracles are more than a shift in perception, because the shift has consequences in the world as we see it. The conversational tone of this Original Edition invites the novice student into conversation with the Author, and even advanced students of A Course in Miracles have found a new clarity and a deeper understanding from their study of the Original Edition of the Course. The restoration of the previously lost material and presentation of the text in its original sequence enlivens the conversation with the Author and gives him a presence that some feel is lacking in the later editions. When encountering Schucman and Thetford's original edition, students frequently find fresh clarity as they read its wording or new understanding. Surely study of the Original Edition is essential to your curriculum.

En este ensayo sobre la paternidad, el autor explora varios aspectos problemáticos de la crianza irresponsable, desde la decisión misma de engendrar prole, pasando por los malos ejemplos deformativos, hasta las últimas etapas de maduración del ser que decidimos no concensuadamente traer al mundo. Se exploran también aspectos tan sensibles como los límites y el complejo de Edipo, o el de Gran Hermano parental. Con espíritu crítico y tono decididamente cítrico, se analizan los aspectos nocivos de la crianza, así como pautas más saludables de formación de la mente que en un futuro heredará el planeta, junto a sus "compañeros de generación".

Magic or spycraft? In 1953, against the backdrop of the Cold War, the CIA initiated a top-secret program, code-named MKULTRA, to counter Soviet mind-control and interrogation techniques. Realizing that clandestine officers might need to covertly deploy newly developed pills, potions, and powders against the adversary, the CIA hired America's most famous magician, John Mulholland, to write two manuals on sleight of hand and undercover communication techniques. In 1973, virtually all documents related to MKULTRA were destroyed. Mulholland's manuals

were thought to be among them—until a single surviving copy of each, complete with illustrations, was recently discovered in the agency's archives. The manuals reprinted in this work represent the only known complete copy of Mulholland's instructions for CIA officers on the magician's art of deception and secret communications.
