AISC offers an extensive collection of documents and publications related to the design and construction of fabricated steel buildings and bridges. Many of our documents are free downloads to the general public, and thousands more are free downloads for AISC members. To access member benefits, you must be logged into the site.

STEEL CONSTRUCTION MANUAL Design of Reinforced Concrete, 10th Edition by Jack McCormac and Russell Brown, introduces the fundamentals of reinforced

concrete design in a clear and comprehensive manner and grounded in the basic principles of mechanics of solids. Students build on their understanding of basic mechanics to learn new concepts such as compressive stress and strain in concrete, while applying current ACI Code.

Specification for Structural Steel Buildings The v15.1 Companion to the AISC Steel Construction Manual is a resource that supplements the 15th Edition Steel Construction Manual and is keyed to the 2016 Specification for Structural Steel Buildings. The v15.1 Companion is an update of the v15.0 Design Examples with the design examples and tables split into two separate volumes.

AISC STEEL CONSTRUCTION MANUAL 14TH EDITION FREE DOWNLOAD PDF

A steel building is a metal structure fabricated with steel for the internal support and for exterior cladding, as opposed to steel framed buildings which generally use other materials for floors, walls, and external envelope. Steel buildings are used for a variety of purposes including storage, work spaces and living accommodation.

Structural steel is a category of steel used for making construction materials in a variety of shapes. Many structural steel shapes take the form

of an elongated beam having a profile of a specific cross section. Structural steel shapes, sizes, chemical composition, mechanical properties such as strengths, storage practices, etc., are regulated by standards in most industrialized countries.

Bolted Steel Construction occurs when steel
fabricators produce finished and painted steel
components, which are then shipped to the site and
simply bolted in place. This is the preferred method
of steel construction, as the bulk of the fabrication can
be done in workshops, with the right machinery,
lighting, and work conditions.
