Swimming Simplified Joffe Books
From celebrated authors Amy Hempel and Jill Ciment writing as A.J. Rich,

a smart, thrilling, sexy, newly engaged to and emotionally riveting novel of psychological suspense about an accomplished woman involved with a man who proves to be an imposter. Morgan Prager, at age thirty, is completing her thesis on victim psychology at John Jay College of Criminal Justice in Manhattan. She is a smart, thrilling, sexy, newly engaged to Bennett, a seductive but possessive and secretive man. She returns from class one day to find Bennett mauled to death, and her dogs—a Great Pyrenees and two pit bulls she has rescued—covered in blood. Bewildered and devastated that her dogs could have committed such

violence, she worries that she might suffer from one of the syndromes she studies: pathological altruism, when selfless acts do more damage than good. When Morgan tries to locate Bennett's parents to tell them about their son's hideous death, she discovers he was not the man he said he was. Everything he has told her—where he was born, where he lives and works—was a lie. In fact, he has several fiancées, and fits the clinical definition of a sociopath. And then, one by one, these other women are murdered. Suddenly Morgan's research into Bennett takes on the urgency of survival: to stay alive, she must find out who is killing the women

Bennett was closest to. Unsettling and highly suspenseful, this is a brilliant collaboration between two outstanding writers. *Find Her Alive* HarperCollins Acclaimed and internationally bestselling crime novelist Caz Frear returns with her third superb novel featuring Cat Kinsella, a cop “on par with Susie Steiner’s and Tana French’s female detectives” (Kirkus Reviews). Four victims. Killer caught. Case closed . . . or is it? Growing up in a London family with ties to organized crime,

Detective Constable Cat Kinsella knows the criminal world better than most cops do. As a member of the city’s Metropolitan Police, she’s made efforts to distinguish herself from her relatives. But leading an upstanding life isn’t always easy, and Cat has come close to crossing the line, a fact she keeps well hidden from her superiors. Working their latest case, Cat and her partner Luigi Parnell discover a connection to a notorious criminal: serial killer Christopher

Masters, who abducted and killed several women in 2012. Though the cops eventually apprehended him, his final victim, Holly Kemp, was never found and he never confessed to her murder, despite the solid eyewitness testimony against him. Now, six years later, the discovery of Holly 's remains near Cambridge seems to be the definitive proof needed to close the case. Still, a few key items of evidence don ' t quite line up. As Cat and Parnell look closer, they find discrepancies that raise troubling

questions. But someone will do anything to keep past secrets hidden—and as they inch closer to the truth, they may be putting themselves in jeopardy . . .

next victim. When the tortured body of a young woman is found in a dumpster, her eyes swollen shut and her clothes soaked with blood, Detective Erika Foster is one of the first at the crime scene. The trouble is, this time, it's not her case. While she fights to secure her place on the investigation team, Erika can't help but get involved and

quickly finds a link to the unsolved murder of a woman four months earlier. Dumped in a similar location, both women have identical wounds - a fatal incision to their femoral artery. Stalking his victims online, the killer is preying on young pretty women using a fake identity. How will Erika catch a murderer who

doesn't seem to exist? Then another girl is abducted while waiting for a date. Erika and her team must get to her before she becomes another dead victim, and, come face to face with a terrifyingly sadistic individual. Survive the Night Bantam

The girl in the photo was laughing, her head thrown back, her lips painted a bright red. Jessie could feel the simple joy reflected in that moment. And as she looked closer, she

saw the same gold cross and chain that had adorned the first victim's neck. When a young woman falls to her death from a parking garage, the Boston police department rule it as a suicide. But when Jessie Novak examines the scene, she isn't so sure... The girl's delicate hands are bruised and her fingernails torn:

evidence of a struggle. Did someone push her from the roof? Then a second young woman is found dead, this time at the foot of her dorm building, her hands injured in the same way as the first victim's with a gold cross and chain clutched in her fist. Jessie is convinced there is a connection and that a twisted killer is on the loose. Forensics

connect the necklace to several murders of college girls in other states—and a suspect who the police had in their sights but were forced to let go—and Jessie knows her hunch is correct. Just as Jessie thinks she is closing in on the culprit, her worst fears are realized: a third girl is found dead. The gap between murders is closing: the killer is

County, Virginia. What separates this psychopath from the others is a peculiar savagery, and an intimate knowledge of the FBI's detailed strategy of pursuit. What separates Vail from her peers is a life that has made her hard and uncompromising. Recently divorced from an abusive husband, and in the throes of an ugly custody battle, she's also helpless against her mother's struggle with Alzheimer's. But little by little, as Vail's personal baggage begins to consume her, access to the FBI's behavioral investigation threatens to derail. Now she's weighing her last hope on a controversial profile. It suggests that the one key to solving the case lies with the seventh victim. But that key will also unlock secrets that could destroy Vail's career, and expose a truth that even she might not be strong enough to survive. In compiling his research for *The 7th Victim*, Alan Jacobson was allowed wide-ranging access to the FBI's behavioral profiling unit over several years. Named one of the top five books of the year by Library Journal, it's "a quantum leap in terror and suspense . . .
