aligns with the

topics and

objectives of many government courses. Faculty involved in the project have endeavored to make government workings, issues, debates, and impacts meaningful and memorable to students while maintaining the conceptual coverage and rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design

at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as

<p>engaged citizens. In current events, order to help students understand the ways that government, society, and individuals interconnect, the revision includes more examples and details regarding the lived experiences of diverse groups and communities within the United States. The authors and reviewers sought to strike a balance between confronting the negative and harmful elements of American government, history, and</p>	<p>while demonstrating progress in overcoming them. In doing so, the approach seeks to provide instructors with ample opportunities to open discussions, extend and update concepts, and drive deeper engagement. NCERT Social Science Practice Book 8 Hardpress Publishing Americans often complain about the operation of their government, but scholars have never developed a complete picture of people's preferred type of government. In this provocative</p>	<p>and timely book, Hibbing and Theiss-Morse, employing an original national survey and focus groups, report the governmental procedures Americans desire. Contrary to the prevailing view that people want greater involvement in politics, most citizens do not care about most policies and therefore are content to turn over decision-making authority to someone else. People's wish for the political system is that decision makers be empathetic and, especially, non-self-interested, not that they be responsive and accountable to the people's largely</p>

nonexistent policy preferences or, even worse, that the people be obligated to participate directly in decision making. Hibbing and Theiss-Morse conclude by cautioning communitarians, direct democrats, social capitalists, deliberation theorists, and all those who think that greater citizen involvement is the solution to society's problems.

"By nearly every measure, Americans are less engaged in their communities and political activity than generations past." So write the editors of this volume, who survey the current practices and history of citizenship education in the United States. They argue that the current period of "creative destruction" —when schools are closing

and opening in response to reform mandates—is an ideal time to take an in-depth look at how successful strategies and programs promote civic education and good citizenship. Making Civics Count offers research-based insights into what diverse students and teachers know and do as civic actors, and proposes a blueprint for civic education for a new generation that is both practical and visionary. Civics for New York State	Under the Constitution of the United States, those with political ambitions who aspire to serve in the federal government must be at least twenty-five to qualify for membership in the House of Representatives, thirty to run for the Senate, and thirty-five to become president. What is the justification for these age thresholds, and is it time to consider changing them? In this provocative and lively book, John Seery presents the case for a constitutional	amendment to lower the age barrier to eighteen, the same age at which citizens become eligible to vote. He divides his argument into three sections. In a historical chapter, he traces the way in which the age qualifications became incorporated in the Constitution in the first place. In a theoretical chapter, he analyzes the normative arguments for office eligibility as a democratic right and liberty. And in a political chapter, he ruminates about the real-

consequences of  
passing such an  
amendment and  
the prospects for its  
passage. Finally, in  
a postscript, he  
argues that  
younger citizens in  
particular ought to  
be exposed to this  
fundamental issue  
in civics.
