Home Care How to Lippincott Williams & Wilkins
This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active

client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Home Care Nursing Handbook Lippincott Williams & Wilkins
This book is designed to foster quality care to home care recipients. It is written for companions, home health aides, and other care givers who deliver non-medical home care. Prieto provides information, tips, and techniques on personal care routines as well as additional responsibilities that are often necessary in this work, including home safety and maintenance, meal planning, errand running, caring for couples, and making use of recreational time. Going beyond standard nurses' aide training manuals, the book focuses on the psycho-social needs of home care recipients, stressing the need to maintain the house as a home and sustaining the recipient's way of life throughout caregiving situations. Prieto stresses interpersonal skills that benefit recipient and caregiver, creating a systematic, easy-to-follow plan for delivering quality service and maintaining, or improving, quality of

life.

The Merck Manual Go-To Home Guide For Symptoms Joint Commission Resources
Written in plain language for nursing home staff caring for residents facing the final phase of life, this book examines eight topics of end-of-life and palliative care in a long-term setting, looking at grief and loss, advance care planning, choices about eating and drinking, pain management, emotional and spiritual care, and self-care for caregivers. Appendices provide prognostic guidelines, assessment instruments, participant handouts, and homework. Henderson is a geriatric nurse practitioner. There is no subject index. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com).

Handbook of Home Health Care Administration Simon and Schuster
esigned specifically to help nurses cope with the challenges of caring for their most acutely ill home care patients, this manual offers step-by-step guidance on those procedures relevant to this patient group without duplicating information covered in other home care manuals. Organized for ease of use, the book's content is sequenced across the lifespan and built around a body system framework. A multidisciplinary approach helps readers address a wide range of conditions and disorders with confidence. The critical thinking process is used to promote problem solving. Other areas addressed include legal issues and documentation essentials. The latest JCAHO, OSHA, and CDC guidelines are also outlined

Home Care Manual Jones & Bartlett Learning

Designed for use as a clinical reference, this manual provides the home care nurse with step-by-step guidelines for performing procedures in the home setting. Comprehensive teaching checklists are included to evaluate the client/family member's understanding of the procedure.

High-risk Newborn Home Care Manual Marrelli and Associates, Inc

It is my hope that this text, when properly used will be of great benefit to the individual aide or aide in training in mastering the required skills that would make the individual a good home health aide. The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The second section is a good aide or good training tool for practical demonstration purposes. For the purpose of understanding only, a home health aide does not have to be a Certified Nurses Aide. As a result this book can be used to train and prepare an individual to function in the capacity of a home health aide. The agency must prepare a set of standardized tests for the aides to ensure that the individual have fully internalized the reaching and training that they have been put through. This book further addresses the rule and regulation (federal and State) that the home health aide must be familiar with. This book is an

excellent tool for the home health aide. I strongly encourage all individual who practice and plans to practice as an aide in the home health field to read this book.
