Antistatic sprays from several different
manufacturers are examined. The sprays are
examined for contamination potential (i.e.,
outgassing and nonvolatile residue), corrosiveness
on an aluminum mirror surface, and electrostatic
effectiveness. In addition, the chemical
composition of the antistatic sprays is determined
by infrared spectrophotometry, mass spectrometry,
and ultraviolet spectrophotometry. The results
show that 12 of the 17 antistatic sprays examined
have a low contamination potential. Of these
sprays, 7 are also noncorrosive to an aluminum
surface. And of these, only 2 demonstrate good
electrostatic properties with respect to reducing
voltage accumulation; these sprays did not show a
fast voltage dissipation rate however. The results
indicate that antistatic sprays can be used on a
limited basis where contamination potential,
corrosiveness, and electrostatic effectiveness is not
critical. Each application is different and proper
evaluation of the situation is necessary.
Information on some of the properties of some
antistatic sprays is presented in this document to
aid in the evaluation process. Ming, James E.

Popular Science gives our readers the
information and tools to improve their
technology and their world. The core belief
that Popular Science and our readers share:
The future is going to be better, and science
and technology are the driving forces that will
help make it better.

[EV - Electric Vehicles Come Home](#)
Veloce Publishing Ltd
Six months after its American
introduction in 1985, the Yugo
was a punch line; within a
year, it was a staple of late-
night comedy. By 2000, NPR's
Car Talk declared it "the worst
car of the millennium." And for
most Americans that's where the

story begins and ends. Hardly.
The short, unhappy life of the
car, the men who built it, the
men who imported it, and the
decade that embraced and
discarded it is rollicking and
astounding, and one of the
greatest untold business-cum-
morality tales of the 1980s.
Mix one rabid entrepreneur,
several thousand "good"
communists, a willing U.S.
State Department, the
shortsighted Detroit auto
industry, and improvident
bankers, shake vigorously, and
you've got *The Yugo: The Rise
and Fall of the Worst Car in
History*. Brilliantly re-
creating the amazing confluence
of events that produced the
Yugo, Yugoslav expert Jason
Vuic uproariously tells the
story of the car that became an
international joke: The
American CEO who happens upon a
Yugo right when his company
needs to find a new import or
go under. A State Department
eager to aid Yugoslavia's
nonaligned communist
government. Zastava
Automobiles, which overhauls
its factory to produce an
American-ready Yugo in six
months. And a hole left by
Detroit in the cheap subcompact
market that creates a race to
the bottom that leaves the Yugo
. . . at the bottom.

"One Last Word is the work of a master
poet." --Kwame Alexander, Newbery
Medal-winning author of *The Crossover*
From the New York Times bestselling and
Coretta Scott King award-winning author
Nikki Grimes comes an emotional, special
new collection of poetry inspired by the
Harlem Renaissance--paired with full-
color, original art from today's most
exciting African-American illustrators.
Inspired by the writers of the Harlem
Renaissance, bestselling author Nikki
Grimes uses "The Golden Shovel" poetic
method to create wholly original poems

based on the works of master poets like
Langston Hughes, Georgia Douglas
Johnson, Jean Toomer, and others who
enriched history during this era. Each poem
is paired with one-of-a-kind art from today's
most exciting African American
illustrators--including Pat Cummings, Brian
Pinkney, Sean Qualls, James Ransome,
Javaka Steptoe, and many more--to create
an emotional and thought-provoking book
with timely themes for today's readers. A
foreword, an introduction to the history of
the Harlem Renaissance, author's note, poet
biographies, and index makes this not only
a book to cherish, but a wonderful resource
and reference as well. A 2017 New York
Public Library Best Kids Book of the Year

Steers buyers through the the confusion and
anxiety of new and used vehicle purchases
like no other car-and-truck book on the
market. "Dr. Phil," along with George Iny
and the Editors of the Automobile
Protection Association, pull no punches.
*Chilton's Hyundai Santa Fe 2001-06 Repair
Manual* Dundurn

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

Popular Science Independently Published
For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This

report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice. The Yugo John Wiley & Sons

This comprehensive manual covers the complete Holden Commodore range including the Utility, Station Wagon and Statesman models. The first chapter, (Engine tune-up and maintenance) guides you through the most basic maintenance and tune-up procedures. It includes all specifications required, regardless of whether you are an owner wishing to change the oil, or a mechanic requiring detailed specifications for tune-up and maintenance. There are comprehensive chapters full of photographs and easy to follow instructions covering the 6Cyl. & V8 Engines, Automatic & Manual Transmissions, Fuel and Engine Management Systems, Brakes, Suspension, Steering, Rear Axle Assembly, Body Electronics, Heating, Interior & Exterior Body etc. There is a dedicated section covering Troubleshooting and Diagnostic Information as well as a comprehensive detailed electrical diagrams. The only manual available covering the complete VT, VX & VY family of vehicles. It is a must have for the D.I.Y. home mechanic through to the trade professionals. This comprehensive manual consists of 492 pages of step by step instructions with over 800 reference diagrams and photographs.

Plunkett's Automobile Industry Almanac 2008 Dale Stubbart

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices

downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

From Strength to Strength St. Martin's Griffin
The roadmap for finding purpose, meaning, and success as we age, from bestselling author, Harvard professor, and the Atlantic's happiness columnist Arthur Brooks. Many of us assume that the more successful we are, the less susceptible we become to the sense of professional and social irrelevance that often accompanies aging. But the truth is, the greater our achievements and our attachment to them, the more we notice our decline, and the more painful it is when it occurs. What can we do, starting now, to make our older years a time of happiness, purpose, and yes, success? At the height of his career at the age of 50, Arthur Brooks embarked on a seven-year journey to discover how to transform his future from one of disappointment over waning abilities into an opportunity for progress. From Strength to Strength is the result, a practical roadmap for the rest of your life. Drawing on social science, philosophy, biography, theology, and eastern wisdom, as well as dozens of interviews with everyday men and women, Brooks shows us that true life success is well within our reach. By refocusing on certain priorities and habits that anyone can learn, such as deep wisdom, detachment from empty rewards, connection and service to others, and spiritual progress, we can set ourselves up for increased happiness. Read this book and you, too, can go from strength to strength.

Martin Heidegger and the Pre-Socratics National Academies Press

Electrification is an evolving paradigm shift in the transportation industry toward more efficient, higher performance, safer, smarter, and more reliable vehicles. There is in fact a clear trend to move from internal combustion engines (ICEs) to more integrated electrified powertrains. Providing a detailed overview of this growing area, *Advanced Electric Drive Vehicles* begins with an introduction to the automotive industry, an explanation of the need for electrification, and a presentation of the fundamentals of conventional vehicles and ICEs. It then proceeds to address the major components of electrified vehicles—i.e., power electronic converters, electric machines, electric motor controllers, and energy storage systems. This comprehensive work: Covers more electric vehicles (MEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs), range-extended electric vehicles (REEVs), and all-electric vehicles (EVs) including battery electric vehicles (BEVs) and fuel cell vehicles (FCVs) Describes the electrification technologies applied to nonpropulsion loads, such as power steering and air-conditioning systems Discusses hybrid battery/ultra-capacitor energy storage systems, as well as 48-V electrification and belt-driven starter generator systems Considers vehicle-to-grid (V2G) interface and electrical infrastructure issues, energy management, and optimization in advanced electric drive vehicles Contains numerous illustrations, practical examples, case studies, and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications *Advanced Electric Drive Vehicles* makes an ideal textbook for senior-level undergraduate or graduate engineering courses and a user-friendly reference for researchers, engineers, managers, and other professionals interested in transportation electrification.

TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP Macmillan

Lemon-Aid New and Used Cars and Trucks 1990-2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than 42 years, pulls no punches.
