The energy industry is boiling over with changes. This title offers a reference tool to the energy industry that covers various things from major oil companies to independents, utilities, pipelines, coal, LNG, oil field services, and refiners. It includes over a dozen statistical tables and profiles of The Energy 500 Firms.

Corporate Yellow Book BRILL

"Women Leaders at Work traces the personal life decisions taken by women who found ways to achieve greatness in their work. Each story is intriguing. But, collectively, the stories provide inspiration. They illustrate how real women of varied talents from varied backgrounds traversed quite different paths, seized opportunities presented in many guises, and found ways to achieve and to contribute to society. Elizabeth Ghaffari relates these stories with an unerring instinct to reveal the fascinating, personal dimensions of real women." Anita K. Jones, University Professor Emerita, University of Virginia "Women Leaders at Work shines a light on women. Today's leaders who are women, who are changing our world, even as examples, inspire young women who are our leaders of the future. Great book!" Frances Hesselbein, President & CEO, Leader to Leader Institute, New York, NY "The stories of each of these amazing women read like novels -- humble beginnings, triumphs, failures, incredible determination and resourcefulness, overcoming the familiar obstacles facing women in the workplace. But these stories are true, and they inspire us. There are many more stories out there, but thanks to Elizabeth Ghaffari, we are privileged to share these few. Groundbreaking women, groundbreaking book." Judith M. Runstad, Attorney, FOSTER PEPPER PLLC, Seattle, WA "I have read many books on leadership and women leaders, and Elizabeth Ghaffari's book rises to the top for me. The in-depth interviews provide insight into leadership in general, issues unique to women, as well as an insider's view into a broad array of industries. Women

---

Leaders at Work highlights superb women leaders, beyond the "usual suspects," many of whom you may never have otherwise come to know." Cathy Sandeen, Ph.D., MBA, Dean, UCLA Extension, University of California, Los Angeles "In her newest book, Elizabeth Ghaffari has scouted out exceptional women who started in small, but courageous ways to follow unique visions. These women achieved positions of influence and power, but their routes to success were never straight-lined. They endured digressions and embraced change. They navigated the intricacies of corporations, academia, non-profits, and the fields of science and technology. They speak with their own voices about their lives and motivation and tell their stories with modesty and encouragement to other women who may want to lead and serve." Mary S. Metz, Ph.D., President Emerita, Mills College "Women Leaders at Work is filled from cover-to-cover with stories about the lives of extraordinary women who are in leadership today. Elizabeth Ghaffari uses her exceptional interviewing talents to ask the right questions to elicit memorable lessons that are inspiring, uplifting and educational. Each of the eighteen chapters focuses on the life and career path of a fascinating, accomplished woman. Ghaffari illustrates that breakthrough success can occur in a myriad of fields from medicine, law, academia, government, public corporations, science and philanthropy. It is not necessary to stay on a narrow hierarchical career path. In fact, none of these champions followed career paths that were straight-line trajectories. 'We often have to be re-potted to grow' and 'Don't leave the power of a corporation just because you want to change the world. Harness it,' are two of the many memorable lessons. Women Leaders at Work is filled with important wisdom and advice for past, present and future leaders. I highly recommend this book for men and women of all ages and interests!" Susan Murphy, Ph.D, noted author, speaker, business consultant, [www.Consult4Business.com](http://www.Consult4Business.com) "Ghaffari's Women Leaders at Work captures diverse personal stories of trailblazing women who share candid experiences including career challenges. It is clear that much more than mentoring matters -- sponsorship is key." Linda Griego, President & CEO, Griego Enterprises, Inc. In Women Leaders at Work, skilled interviewer Elizabeth Ghaffari speaks to women at or near the top of their

professions in a wide array of fields. In part, the book focuses on how they did it: how they prepared, how they overcame obstacles, how they achieved major milestones, and how they took the unconventional turn in the career path that made all the difference. Each chapter is also a gem that contains invaluable insights into gaining and using power responsibly. Every interview shows how female leaders make a difference on a day-to-day basis: charting strategy, managing senior managers and key partners, allocating resources, influencing stakeholders and the public, handling internal problems and competitive challenges, launching initiatives, or pouncing on opportunities the rest of us can't see. This book, like the others in the bestselling Apress At Work series, provides readers with a range of examples and experiences they can use to achieve their own goals. It details key actions or decisions that will help women reach the C-level, win public office, or achieve professional recognition and status. By tapping the wisdom and astute advice of contemporary women in leadership, Women Leaders at Work provides an up-to-date guide for ambitious women seeking professional success. This book: Showcases successful women in leadership positions in the modern millennium Explains how they prepared to take on the challenges leadership imposes Provides advice for those who would follow in their footsteps Demystifies career success for women Other books in the Apress At Work Series: Coders at Work, Seibel, 978-1-4302-1948-4 VentureCapitalists at Work, Shah & Shah, 978-1-4302-3837-9 CIOs at Work, Yourdon, 978-1-4302-3554-5 CTOs at Work, Donaldson, Seigel, & Donaldson, 978-1-4302-3593-4 Founders at Work, Livingston, 978-1-4302-1078-8 European Founders at Work, Santos, 978-1-4302-3906-2 Advertisers at Work, Tuten, 978-1-4302-3828-7 Gamers at Work, Ramsay. 978-1-4302-3351-0

There are few industry sectors in the world today with more potential than renewable and hydrogen energy. Clean, green and renewable energy technologies are receiving immense emphasis from investors, environmentalists, governments and major corporations. Today's high prices for crude oil, coal and natural gas will increase the demand for renewables of all types. A wide variety of technologies are being researched, developed and implemented on a global basis, from Stirling engines to wind power, from advanced nuclear plants to geothermal and fuel cells. Our analysis also includes tar sands (oil sands), oil shale, fuel cells, clean coal, distributed power, energy storage, biofuels and much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 250 leading companies in all facets of the alternative, renewable and hydrogen energy business. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

New Zealand Patent Office Journal Berrett-Koehler Publishers

"Based on the proceedings of the Special Session on Geometry and Physics held over a six month period at the University of Aarhus, Denmark and on articles from the Summer school held at Odense University, Denmark. Offers new contributions on a host of topics that involve physics, geometry, and topology. Written by more than 50 leading international experts."

Automated Diagnostics and Analytics for Buildings Plunkett Research, Ltd.

This book would not have been possible without the dedication and commitment of each of the chapter authors. For some authors, writing a chapter was beyond their " 9 – 5 " job, and this book reflects their commitment to sustainability at the local level for their communities. To every chapter author and their staff, friends, and families, thank you. This dynamic and paradigm-

---

changing volume on the topic of sustainable development is focused on communities such as cities, schools, and colleges where the future of our families and children are most at risk. We must act today as each of the chapters represents in their presentations. This book marks a new era: the Third Industrial Revolution. The new age of the Third Industrial Revolution has been labeled by some as the “green era” or “green economy,” but it had already started around the world, especially in Europe and Japan, for over a decade – since the end of the 20th century. More significantly, the book highlights people and communities who have a shared concern and vision along with the will and determination to enact programs and policies that make sustainable development real – not just political rhetoric or “branding” or even the current “buzz word” for obtaining funds and grants. The book presents “The Sequel to an Inconvenient Truth” – actual examples of how communities can and have changed in order to mitigate climate change. Again, thanks to everyone and their colleagues.

With the widespread availability of high-speed, high-capacity microprocessors and microcomputers with high-speed communication ability, and sophisticated energy analytics software, the technology to support deployment of automated diagnostics is now available, and the opportunity to apply automated fault detection and diagnostics to every system and piece of equipment in a facility, as well as for whole buildings, is imminent. The purpose of this book is to share information with a broad audience on the state of automated fault detection and diagnostics for buildings applications, the benefits of those applications, emerging diagnostic technology, examples of field deployments, the relationship to codes and standards, automated diagnostic tools presently available, guidance on how to use automated diagnostics, and related issues.

The proceedings of the 12th World Congress on Genetics Applied to Livestock Production provide you with 816 papers representing the

leading research in livestock genetics around the globe. This book covers all aspects of genetics applied to livestock production in 44 sections. Next to the exciting plenary speakers, and the recurrent technical and species orientated sections, there are sections focusing on specific challenges for animal breeding. For instance, large-scale phenotyping of individual animals, use of whole genome sequence data and improving genomic prediction, and sessions on the contribution that genetics can make to societal challenges, like animal welfare, climate change, biodiversity, or control of infectious diseases.

Integral Mechanical Attachment, highlights on one of the world's oldest technologies and makes it new again. Think of buttons and toggles updated to innovative snaps, hooks, and interlocking industrial parts.

Mechanical fasteners have been around as long as mankind, but manufacturers of late have been re-discovering their quick, efficient and

---

fail proof advantages when using them as interlocking individual components as compared with such traditional means of joining materials like welding, soldering, gluing and using nuts bolts, rivets and other similar devices. For many years, it has been virtually impossible to find a single-source reference that provides an overview of the various categories of fastening systems and their various applications. Design engineers should find this book to be an invaluable source of detailed, illustrated information on how such fasteners work, and how they can save time and money. Students, too, will find this book to be extremely useful for courses in mechanical design, machine design, product development and other related areas where fastening and joining subjects are taught. This will be the first reference book to come along in many years that will fully illustrate the major classes of integral mechanical fasteners, replete with examples of typical assembly and ideas and suggestions for further research.\* Covers all major techniques for integral mechanical attachment within the context of other types of joining including chemical (adhesive) bonding, melting and solidification (welding, soldering, brazing), and mechanical joining (fasteners and part features)\* Includes specific chapters for particular attachment considerations by materials type, including metals, plastics, ceramics, glass, wood, and masonry\* Provides unique coverage of mechanical/electrical connections for reliable contact and use
