The Classic Texts Series is the only of its kind selection of classic pieces of work that started off as bestseller and continues to be the bestseller even today. These classic texts have been designed so as to work as elementary textbooks which play a crucial role in building the concepts from scratch as in-depth knowledge of concepts is necessary for students preparing for various entrance

exams. The present book on Higher Algebra presents all the elements of Higher Algebra in a single book meant to work as textbook for the students beginning their preparation of the varied aspects covered under Higher Algebra. The present book has been divided into 35 chapters namely Ratio, Proportion, Variation, Arithmetical Progression, Geometrical Progression, Harmonical Progression Theorems Connected with The Progression, Scales of Notation, Surds & Imaginary Quantities, The Theory of Quadratic Equations, Miscellaneous Equations, Permutations & Combinations, Mathematical Induction,

The first few chapters in the book
have been devoted to a fuller
discussion of Ratio, Proportions,
Variation and the Progressions.
Both the theoretical text as well as
examples have been treated
minutely which will help in better
understanding of the concepts
covered in the book. Theoretical
explanation of the concepts in
points has been provided at the
beginning of each chapter. At the
end of each chapter, unsolved
practice exercises have been
provided to help aspirants revise
the concepts discussed in the

chapter. At the end of chapterwise
study, miscellaneous examples
have also been given along with
answers and solutions to the
unsolved examples covered in
each chapter. All the relevant
theorems covered under the
syllabi of Higher Algebra have
also been covered in the detail in
this book. As the book covers the
whole syllabi of Higher Algebra in
detail along with ample number of
solved examples, it for sure will
help the students perfect the
varied concepts covered under the
Higher Algebra section.

Tiny House Design & Construction Guide Rutgers University Press

"I began building tiny houses back in 2009 when I built one for my mom. The house she was living in was starting to fall apart and become unlivable, so I knew I had to find her alternative housing. After researching various options I discovered the tiny house movement and realized that it was the perfect solution for her. A

tiny house could be constructed to very high standards and still be affordable, plus it can be easily moved"--Author Earth Day Koros Press Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific

understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages.

Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the

female mind, Brizendine established the first clinic in the country to study and treat women ' s brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

Troubleshooting and

Repairing Major Appliances. 2nd Ed. Pebble Books

A one-of-a-kind guide to organizing your fridge--including practical tips for meal prep and storage, plus more than 100 recipes--that makes it easier to eat better, save money, and get the most out of your food

Practicing "fridge love" is a roadmap to eating healthier, saving money, and reducing food waste while enjoying a beautiful and harder-working fridge. This book--part organizational guide and part food-prep handbook--is your guide. Author Kristen Hong adopted a nutrient-dense, plant-

based diet in an effort to lose weight and improve her health. But amidst the demands of day-to-day life and a busy family, she found it impossible to stick to. The solution? A smarter, better-organized fridge that served her real-life needs. In this invaluable resource, you will discover how a beautifully organized fridge can make your life--including healthy eating for the whole family--easier. It covers general fridge organization (for all models and configurations) as well as shopping tips, storage guidelines, the best meal-prep containers, and more than 100

easy plant-based recipes made for meal prepping.

This book contains peer-
reviewed papers presented at
the 10th International
Conference on Energy
Efficiency in Domestic
Appliances and Lighting
(EEDAL'19), held in Jinan,
China from 6-8 November
2019. Energy efficiency helps
to mitigate CO2 emissions and

at the same time increases the
security of energy supply.
Energy efficiency is recognized
as the cleanest, quickest and
cheapest energy source. Not
only this, but energy efficiency
brings several additional
benefits for society and end-
users, such as lower energy
costs, reduced local pollution,
better outdoor and indoor air
quality, etc. However, in some
sectors, such as the residential
sector, barriers to investments
in energy efficiency remain.
Legislation adopted in several
jurisdictions (EU, Japan, USA,
China, India, Australia, Brazil,
etc.) helps in removing barriers

and fosters investments in
energy efficiency. These
initiatives complement
innovative financing schemes
for energy efficiency, the
provision of energy services by
energy service companies and
different types of information
programs. At the same time,
progress in appliance
technologies and in solid state
lighting offer high levels of
efficiency. LED lighting is an
example. As with previous
conferences in this series,
EEDAL ' 19 provided a
unique forum to discuss and
debate the latest developments
in energy and environmental

impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

So far working stress method was used for the design of steel structures. Nowadays whole world is going for the limit state method which is more rational. Indian national code IS:800 for the

design of steel structures was revised in the year 2007 incorporating limit state method. This book is aimed at training the students in using IS: 800 2007 for designing steel structures by limit state method. The author has explained the provisions of code in simple language and illustrated the design procedure with a large number of problems. It is hoped that all universities will soon adopt design of steel structures as per IS: 2007 and this book will serve as a good textbook. A sincere effort has been made to present design procedure using simple language, neat sketches and solved problems.
