The humorous and touching memoir of a woman who's been seeking relief from a headache for more than two years. Jennette Fulda was riding high on the success of her first book, *Half-Assed: A Weight-Loss Memoir*, until one fateful day in February 2008, when she developed a headache—and it never went away. So she dealt with it the best way she knows how: by writing about it. And eating lots of chocolate. In *Chocolate and Vicodin*, Jennette explores her change of identity from “the girl who lost hundreds of pounds” to “the girl who lives with constant pain,” and all she's had to endure to try and make the pain stop—from a bevy of expensive, time-consuming tests, which have taught her interesting facts (for example, that an MRI does indeed cost more than a European vacation—and doesn't last nearly as long), to tons of medications prescribed by her doctors to hilarious, sometimes insane advice she's received from her blog readers. While nothing's been able to grant her relief, she has gained a new perspective. Instead of dwelling on the “invisible tiara of nails” she may very well wear for the rest of her life, she's instead learned how to live with the pain, sharing with readers not only how she's managed to get by, but to laugh—and thrive—in spite of it.

ONE OF NPR'S BEST BOOKS OF 2019 A “warm and funny and honest...genuinely unputdownable” (Curtis Sittenfeld) memoir chronicling what it's like to live in today's world as a fat man, from acclaimed journalist Tommy Tomlinson, who, as he neared the age of fifty, weighed 460 pounds and decided he had to change his life. When he was almost fifty years old, Tommy Tomlinson weighed an astonishing—and dangerous—460 pounds, at risk for heart disease, diabetes, and stroke, unable to climb a flight of stairs without

having to catch his breath, or travel on an airplane without buying two seats. Raised in a family that loved food, he had been aware of the problem for years, seeing doctors and trying diets from the time he was a preteen. But nothing worked, and every time he tried to make a change, it didn't go the way he planned—in fact, he wasn't sure that he really wanted to change. In *The Elephant in the Room*, Tomlinson chronicles his lifelong battle with weight in a voice that combines the urgency of Roxane Gay's *Hunger* with the intimacy of Rick Bragg's *All Over but the Shoutin'*. He also hits the road to meet other members of the plus-sized tribe in an attempt to understand how, as a nation, we got to this point. From buying a Fitbit and setting exercise goals to contemplating the Heart Attack Grill in Las Vegas, America's “capital of food porn,” and modifying his own diet, Tomlinson brings us along on a candid and sometimes brutal look at the everyday experience of being constantly aware of your size. Over the course of the book, he confronts these issues head-on and chronicles the practical steps he has to take to lose weight by the end. “What could have been a wallow in memoir self-pity is raised to art by Tomlinson's wit and prose” (Rolling Stone). Affecting and searingly honest, *The Elephant in the Room* is an “inspirational” (The New York Times) memoir that will resonate with anyone who has grappled with addiction, shame, or self-consciousness. “Add this to your reading list ASAP” (Charlotte Magazine).

I Know What to Do, I Just Don't Do It is for women who have spent a lifetime dieting or at weight-loss meetings but are nowhere closer to their goal weight than they were ten, twenty, or thirty years ago. The saboteur seems to lurk at every Monday morning attempt to change. “I know what to do, but I just don't do it.” What's going on here? The issue for many of us is much deeper than what a diet or program can fix. That is because being frustrated, overweight, and out of shape is a symptom of being disconnected from the truth and our true selves. Sue Markovitch takes us through the false beliefs that keep us stuck and replaces them with the truth about who we really are. We are encouraged to change for good, not by finally finding the right diet, program, or other means of control, but by making the shift from lies to truth.

[Always Too Much and Never Enough](#) Harmony

A yet heartbreakingly honest, endearing memoir of incredible weight loss by a young food blogger who battles body image issues and overcomes food addiction to find self-acceptance. All her life, Andie Mitchell had eaten lustily and mindlessly. Food was her babysitter, her best friend, her confidant, and it provided a refuge from her fractured family. But when she stepped on the scale on her twentieth birthday and it registered a shocking 268 pounds, she knew she had to change the way she thought about food and herself; that her life was at stake. It Was Me All Along takes Andie from working class Boston to the romantic streets of Rome, from morbidly obese to half her size, from seeking comfort in anything that came cream-filled and two-to-a-pack to finding balance in exquisite (but modest) bowls of handmade pasta. This story is about much more than a woman who loves food and abhors her body. It is about someone who made changes when her situation seemed too far gone and how she discovered balance in an off-kilter world. More than anything, though, it is the story of her finding beauty in acceptance and learning to love all parts of herself.

**A Tired Older Woman: Loses Weight and Keeps It Off!** Clarkson Potter

Foreword by Gary Vaynerchuk Gary Vaynerchuk's personal trainers explain how you can enjoy your favorite foods without guilt while losing weight, getting stronger, and improving your health. Some "experts" say, Don't eat carbs because insulin makes you fat. Other "experts" say, Don't eat fat because fat makes you fat. Others say, Don't eat protein because protein makes you fat. Some even say, Don't eat fruit because sugar makes you fat. So the logical conclusion would be not to eat anything at all . . . except for the other "experts" who say that makes you fat because it's starvation mode. Who should you believe? Who is right? Who is an ignoramus? And who is just trying to make a quick buck? It's confusing and difficult to know who to trust, but by the end of this book you'll realize you don't need to eliminate anything from your diet. You can enjoy all your favorite foods (in moderation) while losing fat and achieving your goals. The issue is the "in moderation" bit. That's not a fun or sexy sell. And most people are far less likely to spend their money on "moderation" when a half-naked Instagram influencer is advertising that you can lose 50 pounds in 24 hours while stuffing your face full of cake! That said, considering you've got this book in your hands, you must be tired of the lies and deception in fitness marketing and are ready to understand the truth. Let's dive in.

*Fiber Menace: The Truth About the Leading Role of Fiber in Diet Failure, Constipation, Hemorrhoids, Irritable Bowel Syndrome, Ulcerative Colitis, Crohn's Disease, and Colon Cancer* HarperCollins

A paradigm-shifting diet plan that allows you to eat anything you want, as much as you want—and still strip away 20, 40, 60 pounds, or more. After conducting extensive research at the Salk Institute and the National Institute on Aging, poring over copious amounts of new research in intermittent fasting, and engaging 2,000 people for a test panel, bestselling authors David Zinczenko and Peter Moore determined that people can lose remarkable amounts of weight eating the foods they like best—as long as they eat within a set 8-hour time period. Fasting is, of course, an ancient spiritual and health practice, but it's also a way to sidestep many of the ills of the modern world—including diabetes, heart disease, and cognitive impairment. Zinczenko and Moore demonstrate how simply observing this timed-eating strategy, even just three days a week, will reset your metabolism so that you can enter fat-burning mode first thing in the morning—and stay there all day long. And by focusing on eight critical, nutrient-rich Powerfoods, you can build in a second layer of protection against Alzheimer's, heart disease, and even the common cold. In the book, you will find motivating strategies, delicious recipes, and an 8-minute workout routine to maximize calorie burn. The 8-Hour Diet promises to strip away unwanted pounds and give you the focus and willpower you need to reach your goals for weight loss and life.

*The Day My Shorts Fit My Dad* Simon and Schuster

One woman's journey to find herself through juicing, veganism, and love, as she went from fat to thin and from feeding her emotions to feeding her soul. From the extra pounds and unrelenting bullies that left her eating lunch alone in a bathroom stall at school to the low self-esteem that left her both physically and emotionally vulnerable to abuse, Jasmin Singer's struggle with weight defined her life. Most people think there's no such thing as a fat vegan. Most people don't realize that deep-fried tofu tastes amazing and that Oreos are, in fact, vegan. So, even after Jasmin embraced a vegan lifestyle, having discovered her passion in advocating for the rights of animals, she defied any "skinny vegan" stereotypes by getting even heavier. More importantly, she realized that her compassion for animals didn't extend to her own body, and that her low self-esteem was affecting her health. She needed a change. By committing to monthly juice fasts and a diet of whole, unprocessed foods, Jasmin lost almost a hundred pounds, gained an understanding of her destructive relationship with food, and finally realized what it means to be truly full. Told with humble humor and heartbreaking honesty, this is Jasmin's story of how she went from finding solace in a box of cheese crackers to finding peace within herself.

From the bestselling author of *The Year of Living Biblically* and *The Know-It-All* comes the true and truly hilarious story of one person's quest to become the healthiest man in the world. Hospitalized with a freak case of tropical pneumonia, goaded by his wife telling him, "I don't want to be a widow at forty-five," and ashamed of a middle-aged body best described as "a python that swallowed a goat," A.J. Jacobs felt compelled to change his ways and get healthy. And he didn't want only to lose weight, or finish a triathlon, or lower his cholesterol. His ambitions were far greater: maximal health from head to toe. The task was epic. He consulted an army of experts—sleep consultants and sex clinicians, nutritionists and dermatologists. He subjected himself to dozens of different workouts—from Strollercize classes to Finger Fitness sessions, from bouldering with cavemen to a treadmill desk. And he took in a cartload of diets: raw foods, veganism, high protein, calorie restriction, extreme chewing, and dozens more. He bought gadgets and helmets, earphones and juicers. He poked and he pinched. He counted and he measured. The story of his transformation is not only brilliantly entertaining, but it just may be the healthiest book ever written. It will make you laugh until your sides split and endorphins flood your bloodstream. It will alter the contours of your brain, imprinting you with better habits of hygiene and diet. It will move you emotionally and get you moving physically in surprising ways. And it will give you occasion to reflect on the body's many mysteries and the ultimate pursuit of health: a well-lived life.

Simple and counterintuitive, this extraordinary new diet is changing the way the world thinks about weight loss—one success story at a time.
