This third edition of the famous introductory physics text has been thoroughly revised and updated. The new edition contains two entirely new chapters: "Relativity" as the concluding chapter of the regular version, and "Particles and the Cosmos" as the concluding chapter of the extended version. New also are 16 essays, distributed throughout the text, on applications of physics to "real world" topics of student interest. Each essay is self-contained and is written by an expert in the topic. The body of the text contains more help in problem-solving and the chapter sections are shorter, making the material more accessible. There are more photos and diagrams than before, including attention-getting chapter-head photos and captions. The number of worked examples has been increased, as has the number of questions, exercises, and problems. In addition, a thread of ideas from relativistic and quantum physics is woven through the earlier chapters, preparing the way for the later chapters.

The publication of the first edition of Physics in 1960 launched the modern era of physics textbooks. It was a new paradigm then and, after 40 years, it continues to be the dominant model for all texts. The big change in the market has been a shift to a lower level, more accessible version of the model. Fundamentals of Physics is a good example of this shift. In spite of this change, there continues to be a demand for the original version and, indeed, we are seeing a renewed interest in Physics as demographic changes have led to greater numbers of well-prepared students entering university. Physics is the only book available for academics looking to teach a more demanding course.

A coming of age story of two American sisters in Hong Kong during the late 1960s. "A haunting novel written with the craft and grace of a master" (Isabel Allende). Summer 1967. The turmoil of the Maoist revolution is spilling over into Hong Kong and causing unrest as war rages in neighboring Vietnam. White Ghost Girls is the story of Frankie and Kate, two American sisters living in a foreign land in a chaotic time. With

their war-photographer father off in Vietnam, Marianne, their beautiful but remote mother, keeps the family nearby. Although bound by a closeness of living overseas, the sisters could not be more different—Frankie pulses with curiosity and risk, while Kate is all eyes and ears. Marianne spends her days painting watercolors of the lush surroundings, leaving the girls largely unsupervised, while their Chinese nanny, Ah Bing, does her best to look after them. One day in a village market, they decide to explore—with tragic results. In Alice Greenway's exquisite gem of a novel, two girls tumble into their teenage years against an extraordinary backdrop both sensuous and dangerous. This astonishing literary debut is a tale of sacrifice and solidarity that gleams with the kind of intense, complicated love that only exists between sisters. "Greenway is a remarkable young writer who vividly evokes Hong Kong's sights, smells, and sounds in poetic, finely detailed prose. What's more, she seems to have remembered every single charged emotion from adolescence and filters them all through the sisters' fierce, complex relationship. A heartbreakingly beautiful debut."
