NASA Tech Briefs Surplus Record

Canada's future prosperity is of utmost concern to citizens, industry leaders and policy makers. Using original public opinion research from EKOS, Redesigning Work argues that improving people's jobs and workplaces can unlock the potential to strengthen Canada's economy and improve the well-being of Canadians. Graham Lowe and Frank Graves are two of Canada's leading experts on work and public opinion. In Redesigning Work the authors provide a blueprint for the future of work in Canada by identifying practical ways to make work more motivating, rewarding and productive. The authors provide fuel for employers, workers, policy makers, HR professionals, and NGOs to combat the negative trends many Canadians associate with their future economic prospects. The book paints an optimistic picture of the future of work by addressing job stress, work-life balance, skill use and engagement. Directory of Foreign Firms Operating in the United States Surplus

The book presents basic theories of transformer operation, design principles and methods used in power transformer designing work, and includes limitation criteria, effective utilization of material, and calculation examples to enhance readers' techniques of transformer design and testing. It includes: Core and winding commonly used, and their performances Insulation structures and materials, methods for improvements on dielectric strengths on partial discharge, breakdown and electrical creepage Losses and impedance calculations, major influential factors, and methods to minimize load loss Cooling design and the method to obtain effective cooling Short-circuit forces calculations, the ways to reduce the short-circuit forces, and measures to raise withstand abilities No-load and load-sound levels, the influential factors and trends, and abatement techniques In-depth discussion of an autotransformer's special features, its stabilizing winding function, and its adequate size Tests and diagnostics The ways to optimize design are also discussed throughout the book as a goal to achieve best performances on economic design. The book contains great reference material for engineers, students, teachers, researchers and anyone in the field associated with power transformer design, manufacture, testing, application and service maintenance. It also provides a high level of detail to help future research and development maintain electrical power as a reliable and economical energy resource.

The Macdonald Stewart Art Centre's exhibition explores contemporary Canadian adaptations in theatre, pop media, and visual arts in a demonstration of the Shakespeare effect in Canadian culture. It brings together for the first time hundreds of rare artifacts, including the

Canadian-owned Sanders portrait, contemporary Canadian theatre designs, Shakespeare in French Canada, contemporary Aboriginal adaptations of Shakespeare, new portraiture, an innovative learning commons for youth, as well as new and archival material from the Canadian Adaptations of Shakespeare Project, the L. W. Conolly Theatre Archives (University of Guelph), and the Stratford Festival of Canada. Shakespeare--made in Canada

The purpose of the inquiry reported in this document was to determine whether the increased imports of any of nine steel products since 1996 were a principal cause of serious injury, or a threat of serious injury, to Canadian steel producers. Over 175 parties participated in the inquiry, including Canadian & foreign steel producers, steel importers & users, union representatives, and the Commissioner of Competition. The inquiry tribunal conducted two separate hearings, the first concerning injury and the second concerning remedies. The first five chapters provide information on the conduct of the inquiry, its international context, the goods covered by the inquiry, and the inquiry's legal framework. Chapters 5 to 8 provide reasons for the tribunal's determinations on injury for discrete plate steel, hot- & cold-rolled sheet & coil, corrosion-resistant sheet & coil, hot-rolled bars, angles & shapes & sections, cold-drawn & finished bars & rods, reinforcing bars, and standard pipe. The final section makes recommendations on appropriate remedies.
