Marine Combustion Practice reviews developments in marine combustion practice and covers topics ranging from combustion equipment for boilers to diesel injection equipment, nuclear reactors, and the use of natural gas in marine boilers. Automatic control of oil-fired marine boilers is discussed, along with fundamental types of injection pumps and factors affecting combustion in marine boilers. This book is divided into four sections and opens with a discussion on solid fuel used for marine purposes, including coal, and properties of coal affecting combustion and combustion equipment design. The reader is then introduced to fuel storage and supply systems; types of fuel injectors and fuel pumps; physics and technology of nuclear power; and sea transport of liquid petroleum gases used in marine boilers. Subsequent chapters deal with factors affecting marine combustion; characteristics of boil-off; and safety aspects of the use of natural gas in marine boilers. This monograph will be a valuable source of information for marine engineers and for practitioners and research workers in the field of marine combustion.

Arbitration and Rent Review has become a standard work in the property world for guidance on rent review. In a clear style, the author examines the procedures that landlord and tenant should follow in order to agree a new rent or to have one decided by arbitration. By means of cases, he highlights the key areas of conflict that come before the courts, the contentious issues being introduced in the order in which they would be encountered by landlords or tenants facing a review.

The journal Industrial Biotechnology has for some years been spreading the word about cooperation between academic researchers and industrial biotechnologists. This cooperation has been fostered by the setting up of Biotechnology Centres to promote the exchange of ideas and enterprise. This volume consists of major articles from Industrial Biotechnology which reflect both the educational nature of much of the journal's output and the very wide range of its subject matter. The articles cover some of the basic biological processes that are the resources of biotechnology and consider major applications in pharmaceuticals, agriculture, food processing, biosensors and other areas. The future of biotechnology and its progress in other countries is also considered. This will be of vital interest for all workers in the field of biotechnology and those who have an interest in the development of this exciting and diverse field.
