Data analytics can be defined as "the process of gathering and analyzing data and then using the results to make better decisions" (Stippich and Preber, Data Analytics: Elevating Internal Audit's Value (Institute of Internal Auditors Research Foundation 2016)). Under this definition, data analytics is clearly a process that organizations have always attempted to optimize.

Cluster analysis or clustering is the task of grouping a set of objects in such a way that objects in the same group (called a cluster) are more similar (in some sense) to each other than to those in other groups (clusters).It is a main task of exploratory data mining, and a common technique for
