Introduction to Policing Rowman & Littlefield

Accountability of Policing provides a contemporary and wide-ranging examination of the accountability and governance of 'police' and 'policing'. Debates about 'who guards the guards' are among the oldest and most protracted in the history of democracy, but over the last decade we have witnessed important changes in how policing and security agencies are governed, regulated and held to account. Against a backdrop of increasing complexity in the local, national and transnational landscapes of 'policing', political, legal, administrative and technological developments have served to alter regimes of

accountability. The extent and pace of these changes raises a pressing need for ongoing academic research, analysis and debate. Bringing together contributions from a range of leading scholars, this book offers an authoritative and comprehensive analysis of the shifting themes of accountability within policing. The contributions explore questions of accountability across a range of dimensions, including those 'individuals' and 'institutions' responsible for its delivery, within and between the 'public' and 'private' sectors, and at 'local', 'national' and 'transnational' scales of jurisdiction. They also engage with the concept of 'accountability' in a broad sense, bringing to the surface the various meanings that have become associated with it, and demonstrating how it is invoked and interpreted in different contexts. Accountability of Policing is essential reading for academics and students involved in the study of policing, criminal justice and criminology and will also be of great interest to practitioners and policymakers.

An Introductory Guide Oxford University Press

The main objective of the second edition of the Routledge Handbook of Critical Criminology is twofold: (1) to provide original chapters that cover contemporary critical criminological theoretical offerings generated over the past five years and (2) to provide chapters on important new substantive topics that are currently being studied and theorized by progressive criminologists. Special attention is devoted to new theoretical directions in the field, such as southern criminology, queer criminology, and green criminology. The diverse chapters cover not only cutting-edge theories, but also the variety of research methods used by leading scholars in the field and the rich data generated by their rigorous empirical work. In addition, some of the chapters suggest innovative and realistic short- and long-term policy proposals that are typically ignored by mainstream criminology. These progressive strategies address some of the most pressing social problems facing contemporary society today, which generate much pain and suffering for socially and economically disenfranchised people. The new edition of the Handbook is a major work in redefining areas within the context of international multidisciplinary critical research, and in highlighting emerging areas, such as human trafficking, Internet pornography and image-based sexual abuse. It is specifically designed to be a comprehensive resource for undergraduate and postgraduate students, researchers and policymakers.

#### **Policing the Media Routledge**

This succinct, tightly-written book offers a critical examination of the key issues facing policing in modern Britain. Those issues can be summarised in the following way: how is the apparently insatiable demand by the public for more policing and better protection to be satisfied, given the continued limits on public spending; that there is concern that what the public demands may not have a significant effect on crime levels; and that further extension of police powers and the reach of the law could themselves have unwanted consequences. All these questions are posed and answered on the basis of the wealth of research and operational evidence gathered by the police service itself, the Home Office, and independent researchers.

Over the past two centuries, many aspects of criminal behavior have been investigated. Finding this information and making sense of it all is difficult when many studies would appear to offer contradictory findings. The *Handbook of Crime Correlates* collects in one source the summary analysis of crime research worldwide. It provides over 400 tables that divide crime research into nine broad categories: Pervasiveness and intra-offending relationships Demographic factors Ecological and macroeconomic factors Family and peer factors Institutional factors Behavioral and personality factors Cognitive factors Biological factors Crime victimization and fear of crime Within these broad categories, tables identify regions of the world and how separate variables are or are not positively or negatively associated with

---

criminal behavior. Criminal behavior is broken down into separate offending categories of violent crime, property crime, drug offenses, sex offenses, delinquency, general and adult offenses, and recidivism. Accompanying each table is a description of what each table indicates in terms of the positive or negative association of specific variables with specific types of crime by region. This book should serve as a valuable resource for criminal justice personnel and academics in the social and life sciences interested in criminal behavior.

Transnational organized crime crosses borders, challenges States, exploits individuals, pursues profit, wrecks economies, destroys civil society, and ultimately weakens global democracy. It is a phenomenon that is all too often misunderstood and misrepresented. This handbook attempts to redress the balance, by providing a fresh and interdisciplinary overview of the problems which transnational organized crime represents. The innovative aspect of this handbook is not only its interdisciplinary nature but also the dialogue between international academics and practitioners that it presents. The handbook seeks to provide the definitive overview of transnational organized crime, including contributions from leading international scholars as well as emerging researchers. The work starts by examining the origins, concepts, contagion and evolution of transnational organized crime and then moves on to discuss the impact, governance and reactions of governments and their agencies, before looking to the future of transnational organized crime, and how the State will seek to respond. Providing a cutting edge survey of the discipline, this work will be essential reading for all those with an interest in this dangerous phenomenon.

What is intelligence-led policing? Who came up with the idea? Where did it come from? How does it relate to other policing paradigms?

What distinguishes an intelligence-led approach to crime reduction?
