With international attention focused on Hong Kong, many forget that Macau

also exists in a delicate `one country, two systems ` (OCTS) balance with mainland China. This book provides insights into the circumstances surrounding the less-understood half of China ` s OCTS policy, including the stagnation of representational government, and the location of any Macau characteristics in the Macau Basic Law. Despite being Hong Kong ` s sister `Special Administrative Region ` (SAR) within the People ` s Republic of China, Macau ` s unique constitutional development under Portuguese and Chinese administration remains under-appreciated despite its potential contributions to local, national, and international constitutional discourse. Utilizing a multi-disciplinary approach including doctrinal, historical, and comparative methodologies, this work fills that gap. The research blends

---

Portuguese, Chinese, and foreign-language sources in order to reconstruct a balanced constitutional narrative. The book focuses on a consequential effect of globalization – that is, the assimilation of a longstanding and unique constitutional order by a new hegemonic sovereign – including processes for internationalization as China opened up, legal harmonization of two distinct legal and socioeconomic orders, juridification of local affairs with the establishment of a new local court system in preparation for handover to the Chinese regime, and democratization (or the lack thereof) among the various communities comprising the Macanese polity before and since. Focusing on Macau 's unique development at the crux of European and Chinese empires, and the role it plays as a mirror for Chinese intentions vis-a-vis Hong Kong today, the book will be of interest to those working in Constitutional Law, Politics and History.

In recent years there has been a revival of interest in the philosophical study of contract law. In 1981 Charles Fried claimed that contract law is based on the philosophy of promise and this has generated what is today known as 'the contract and promise debate'. Cutting to the heart of contemporary discussions, this volume brings together leading philosophers, legal theorists, and contract lawyers to debate the philosophical foundations of this area of law. Divided into two parts, the first explores general themes in the contract theory literature, including the philosophy of promising, the nature of contractual obligation, economic accounts of contract law, and the relationship between contract law and

moral values such as personal autonomy and distributive justice. The second part uses these philosophical ideas to make progress in doctrinal debates, relating for example to contract interpretation, unfair terms, good faith, vitiating factors, and remedies. Together, the essays provide a picture of the current state of research in this revitalized area of law, and pave the way for future study and debate.

This book is an ideal guide to umbrella reviews, overviews of reviews, and meta-epidemiologic studies for evidence synthesis. Research is conducted at different levels: primary research consists of original studies while secondary research comprises qualitative reviews, systematic

reviews, and meta-analyses. Recently, a novel further level of research has been introduced, based on the analysis and pooling of reviews and meta-analysis. This book is the first to focus solely on this new type of research design, which permits a comprehensive and powerful synthesis of scientific evidence in medicine as well as in many other fields in order to inform decision-making. All aspects are covered, including review design and registration, the searching, abstracting, appraisal, and synthesis of evidence, the appraisal of moderators and confounders, and state of the art reporting. Case studies in a range of medical specialties are then presented. The hands-on approach of the book, written by a multinational team of experts, will enable the reader to interpret and independently conduct umbrella reviews.
