This is volume 2 of a two-volume set that collects 300 of the most entertaining and important folk and fairy tales of Giuseppe Pitré, a nineteenth century Sicilian folklorist whose significance ranks alongside the Brothers Grimm. In stark contrast to the more literary ambitions of the Grimms' tales, Pitré's possess a charming, earthy quality that reflect the customs, beliefs, and superstitions of the common people more clearly than any other European folklore collection of the 19th century. Edited, translated, and with a critical introduction by world-renowned folk and fairy tale experts Jack Zipes and Joseph Russo, this is the first collection of Pitré's tales available in English. Carmelo Letterer's illustrations throughout the volume are as lively and vivid as the stories themselves, illuminating the remarkable imagination captured in the tales.

This collection of essays presents an authoritative and penetrating comment on the use of the computer in teaching law. The authors have taught and developed instructional materials for many years; they are intimately familiar with the substance of the law, as well as with the teaching techniques that have proven

successful. Among the subjects discussed are the development of law-related programmed workbooks, predecessors to computer-aided instruction (CAI); research findings and their implications for the design of law-related CAI exercises; advantages and limitations of CAI programs in law; and attempts to measure the effectiveness of CAI as a method of law instruction. The authors outline the process involved in writing and publishing computer-aided instruction in the field of law and describe current experiments through which several exercises in law are being cooperatively used via a computer network, EDUNET. The Handyman HODI Publishing Barney Snow, a voluntary participant in medical experiments at a hospital for the terminally ill, becomes emotionally involved with the dying patients. The Collected Sicilian Folk and Fairy Tales of Giuseppe Pitrè Prentice Hall Would you face danger or run away? Periodicals Simon and Schuster In Assessment and Intervention for Executive Function Difficulties, McCloskey, Perkins, and Diviner provide a unique blend of theory, research, and practice that offers clinicians an overarching framework for the concept of executive functions (EFs) in educational settings. The conceptual model of executive functions is detailed, including their role in behavior, learning, and production across all settings. The heart of the book focus on the practical issues involved in the use of assessment tools, tests, report writing, and the implementation and follow-up of targeted interventions using the EF model. Six case studies are introduced in Chapter 1 and followed throughout the book, building understanding of the executive function difficulties of each child, assessment for identifying the difficulties, and interventions for dealing with the difficulties. An additional case

study is discussed in detail in one of the concluding chapters, and downloadable resources will provide the practitioner with a wealth of assessment forms, parent and teacher handouts, behavior tracking charts, and report/documentation forms.
