On numerous occasions and over a long period of time I have predicted specific events far in advance, attributing all to the workings of divine power and inspiration, together with other fortunate or unfortunate happenings, foreseen in their full unexpectedness, which have already come to pass in various regions of the earth. Yet I have wished to remain silent and abandon my work because of the injustice not only of the present time [the Inquisition] but also for most of the future. I will not commit to writing. Irreverent (and Slightly Vulgar) Activities for Adults Turner Publishing Company Inspired by a landmark exhibition mounted by the British Museum in 1963 to celebrate five eventful centuries of the printed word, Nicholas A. Basbanes offers a lively consideration of writings that have "made things happen" in the world, works that have both nudged the course of history and fired the imagination of countless influential people. In his fifth work to examine a specific aspect of book culture, Basbanes also asks what we can know about such figures as John Milton, Edward Gibbon, John Locke, Isaac Newton, Samuel Taylor Coleridge, John Adams, Frederick Douglass, Abraham Lincoln, Henry James, Thomas Edison, Helen Keller — — even the notorious Marguis de Sade and Adolf Hitler - - by knowing what they have read. He shows how books that many of these people have consulted, in some cases annotated with their marginal notes, can offer tantalizing clues

to the evolution of their character and the development of their thought. > It's a State of Mind Oxford University Press, USA Understanding the fatigue behaviour of structural components under variable load amplitude is an essential prerequisite for safe and reliable lightweight design. For designing and dimensioning, the expected stress (load) is compared with the capacity to withstand loads (fatigue strength). In this process, the safety necessary for each particular application must be ensured. A prerequisite for ensuring the required fatigue strength is a reliable load assumption. The authors describe the transformation of the stress- and loadoperational conditions to spectra or matrices with which must be considered for ensuring a reliable load assumption for designing and dimensioning are discussed in detail. Furthermore, the theoretical background for estimating the fatigue life of structural components is explained, and the procedures are discussed for numerous applications in practice. One of the prime intentions of the authors is to provide recommendations which can be implemented in practical applications.

This richly orchestrated novel, which won a national literary prize in the author's native land, Venezuela, also earned international recognition when the William Faulkner Foundation gave it an award as the most notable novel published in Ibero America between 1945 and 1962. Cumboto's disturbing story unfolds during the early decades of the twentieth century on a Venezuelan coconut plantation, in a turbulent Faulknerian double world of black and white. It records the lives of Don Federico, the effete survivor of a once vigorous family of landowners, and his Negro servant Natividad, who since the days of their mutual childhood has been his only friend. Young Federico, psychologically impotent and lost to

human contact, lives on as a lonely recluse in the century-old main house of "Cumboto," surrounded by descendants of African slaves who still manage. despite his apathy, to keep the plantation on its feet. Natividad's heroic and selfless struggle to redeem his friend by awakening him to the stirrings of the earth and life about him sets in motion a series of events that are to shatter Federico's childlike world: a headlong love affair with a voluptuous black girl, her terrified flight in the face of the bitter condemnation of her own people, and the unexpected appearance, twenty years later, of their extraordinary son. Throughout the novel runs a recurring theme: neither race can survive without the other. Black and white. Dí az Sánchezz suggests, embody contrasting aspects of human nature, which are not inimical but complementary: the languid intellectualism of European culture must be tempered with the indestructible vitality and intuition of the African soul if humanity is ever fully to comprehend the living essence of the world.
