For ten years and in two classic books, Irene Fountas and Gay Su Pinnell have described how to analyze the characteristics of texts and select just-right books to use for guided reading instruction. Now, for the first time, all of their thinking and research has been updated and brought together into Leveled Books, K-8 to form the ultimate guide to choosing and using books from kindergarten

through middle school. Fountas and Pinnell take you through every aspect of leveled books, describing how to select and use them for different purposes in your literacy program and offering prototype descriptions of fiction and nonfiction books at each level. They share advice on: the role of leveled books in reading instruction, analyzing the characteristics of fiction and nonfiction texts, using benchmark books to assess instructional levels for guided reading, selecting books for both guided and independent reading, organizing high-quality classroom libraries, acquiring books and writing proposals to fund classroom-library purchases, creating a school book room. In addition, Fountas and Pinnell explain the leveling process in detail so that you can tentatively level any appropriate book that you want to use in your instruction. Best of all, Leveled Books, K-8 is one half of a new duo of resources that will change how you look at leveled books. Its companion-www.FountasandPinnellLeveledBooks.com-is a searchable and frequently updated website that includes more than 18,000 titles. Pembroke Publishers Limited C. S. Lewis is the 20th century's most widely read Christian writer and J.R.R. Tolkien its most beloved mythmaker. For three decades, they and their closest associates formed a literary club known as the Inklings, which met every week in Lewis's Oxford rooms and in nearby pubs. They discussed literature, religion, and ideas; read aloud from works in progress; took philosophical rambles in woods and fields; gave one another companionship

to educating yourself in the classical tradition. Have you lost the art of reading for pleasure? Are there books you know you should read but haven't because they seem too daunting? In *The Well-Educated Mind*, Susan Wise Bauer provides a welcome and encouraging antidote to the distractions of our age, electronic and otherwise. In her previous book, *The Well-Trained Mind*, the author provided a road map of classical education for parents wishing to home-school their children, and that book is now the premier resource

for home-schoolers. In this new book, Bauer takes the same elements and techniques and adapts them to the use of adult readers who want both enjoyment and self-improvement from the time they spend reading. The Well-Educated Mind offers brief, entertaining histories of five literary genres—fiction, autobiography, history, drama, and poetry—accompanied by detailed instructions on how to read each type. The annotated lists at the end of each chapter—ranging from Cervantes to A. S. Byatt,

Herodotus to Laurel Thatcher Ulrich—preview recommended reading and encourage readers to make vital connections between ancient traditions and contemporary writing. The Well-Educated Mind reassures those readers who worry that they read too slowly or with below-average comprehension. If you can understand a daily newspaper, there's no reason you can't read and enjoy Shakespeare's Sonnets or Jane Eyre. But no one should attempt to read the "Great Books" without a guide and a plan.

Susan Wise Bauer will show you how to allocate time to your reading on a regular basis; how to master a difficult argument; how to make personal and literary judgments about what you read; how to appreciate the resonant links among texts within a genre—what does Anna Karenina owe to Madame Bovary?—and also between genres. Followed carefully, the advice in The Well-Educated Mind will restore and expand the pleasure of the written word. **Reader's Guide to Lesbian and Gay Studies**

The end of the 1990s saw increasing criticism of the media's treatment of the scandals in Washington. Critics complained that journalists either had not covered the political crisis well, that they had bungled it, or that they had simply blown it out of proportion. Some went so far as to call the situation Pressgate. As Hayden points out, however,

the larger question remained: What was Clinton's overall relationship with the media? Hayden examines presidential-press relationships in the 1990s, focusing first on the 1992 campaign, then on issues and events over Clinton's two terms. He analyzes the press response to the programs of the Clinton era as well as the scandals, the roles of consultants like

James Carville, the effectiveness of various press secretaries, and the use of pollsters like Dick Morris. He also examines the fate of the First Amendment in the 1990s and how Clinton responded to freedom of expression concerns. This analysis will be of interest to media specialists as well as the general public concerned with contemporary Washington

politics and journalism. Series Harcourt School Publishers Renita Schmidt and P. L. Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders. While the intent of that mission is basically sound in theory—we instill the idea that teachers at all levels are professionals, always learning and growing in knowledge—that theory, that philosophical underpinning does not insure that the students who complete our program are confident about the act or

performance of teaching. In our unique program, students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching; the program is heavily field-based, and it depends on the effectiveness of mentoring throughout the coursework and the first semester of full-time teaching. Students tell us this guidance and support is invaluable, and yet we feel the disjuncture between

university and school just as many of you in more traditional student teaching settings. Students hear “ best practice ” information from us in methods classes and they receive ample exposure to the research supporting our field, but have a hard time implementing research-based practices in their cla- room settings and an even harder time finding it in the classrooms around them.
