Harley-Davidson VIN Decoder for free by VIN Number

Harley-Davidson used as many as four Big-Twin engines between 1929 and 1968, ranging from the Flathead, Knucklehead, Panhead and Shovelhead engines. Engines built before 1969 typically use a 10- or 11-digit identification number, starting with a two-digit production date, followed by a two- or four-character model type and a four- or five-digit production run number.

Harley Davidson: Harley Davidson Engine Identification

These models had engines numbered with a separate "crankcase number" instead of the frame's VIN. This engine number is reported to be a ten digit numeric ID. Rumor has it that Harley went back to the old numbering sequence once the legal ramifications were realized. Regardless of the engine case number, the title must always match the frame VIN.

Techs Harley Davidson VIN Information Guide

Different numbers are stamped in different locations on your Harley Davidson motorcycle. The Vehicle Identification Number is on the swingarm frame and on the crankcase. Numbers are also stamped on the cylinder. Some might think this is the parts number, but the three-part number stands for the casting number. Casting ...
