Hemi. The word conjures up visions of racing and street domination. Widely regarded as one of the greatest American V-8s ever produced, Chrysler released its third-generation version of the engine in 2003 and installed it in a wide range of Chrysler cars and trucks. Through the years, the 5.7, 6.1, 6.2 Hellcat, and 6.4 Hemi engines have established an impressive high-performance reputation that builds on the proud heritage of the engine family. Most stock Hemi engines produce an impressive one horsepower per cubic inch, but they can make substantially more torque and horsepower for specific applications. Fitted with the right high-performance parts, these powerful engines can produce far more horsepower and torque than stock. Selecting the ideal parts for the engine and application is essential. Veteran author and dyno testing expert Richard Holdener has done the research, gathered the data, and provided a detailed analysis of the results. Within the pages of this book, heads and camshafts, headers and exhaust, intakes, throttle bodies, manifolds, electronic engine controls, forced-air induction, and nitrous oxide are all tested. Using this comprehensive information and the dyno results, you can select the best performance parts for your engine and application. Each test provides a thorough description of the parts, test engine, and testing conditions, plus evaluation and insight into the results. Tests from budget to high-end engine builds are conducted to fit a wide spectrum of applications, so you can apply the testing data and results to your specific build project. Horsepower and torque graphs illustrate dyno test results for clear comparisons. In turn, it takes all the guesswork out of selecting parts, which saves you time and money. Although the New Hemi produces excellent performance in stock form, it 's just the starting point. With the right parts, you can build the most potent street, street/strip, or full-race engine. Whether you 're building a mild street Hemi, a race engine, or something in between, this book is a valuable resource.

Dats were da secret stuff is. The cabby asked.

Where ya'll going, boy. Juneau Ave, 3700 West Juneau Ave. I said. Wastin' yer time, boy. He admonished. Ya'll ain't gitten in der. Dats were dey do dat secret stuff You mean research and development? I volunteered. Ain't dat what I said boy! I will wait here. Got me a two-way trip, cuz you ain't gitten in. The old six-story building at 3700 West Juneau Ave. in Milwaukee looks exactly what it is, a pre World War II factory. It now houses H-D's corporate offices, normal and secret storage, and Harley-Davidson Archives. The modern Milwaukee factories are located on Pilgrim Road, which normally does not offer tours and the Capitol Drive Plant that does have public tours. It has a little Harley store, which has exclusive souvenirs only available there. Out front of the Juneau facility is a Harley's only parking lot with a No Cages Allowed sign. Surrounding this primo parking area are the less desirable parking areas for the cages (cars). The security in the lobby inside was strict. Enclosed in protective glass was a 1903 Harley-Davidson. It was gussied up to look better than it did back then. Its single-cylinder 3 HP belt-driven engine with no transmission contrasted greatly with the 95th anniversary Road King in the opposite corner. After this article was published in American Iron Magazine, Dr. Martin Rosenblum, the official Harley-Davidson historian wrote a letter to AIM asserting that I was incorrect and that the 1903 Harley was indeed totally original and identical to when manufactured. Dr. Rosemblum wrote, Thank you for the wonderful piece you wrote entitled Security at Juneau Ave. However, you made a serious error in referring to our 1903-04 Harley-Davidson as a replica. It is not. It is the real thing. Please inform your readers that we have Serial Number One in our lobby for the world to see just as it rolled out of the original factory. Dr. Martin Jack Rosenblum Harley-Davidson Archives Historian I replied 1903 Harley-Davidson that's been gussied up to look better than it did back then. I could tell the bike wasn't a replica but I commented to a factory worker who was conducting a tour that it sure was pretty. It was obviously nicer looking than it was in 1903. He laughed and said, It sure is. Donny Petersen. We disagree but Dr. Rosenblum is an authority on Harley-Davidson and did a wonderful job historically documenting the history of this venerable company. Harley-Davidson Secrecy and Security Returning to the lobby, opposite the 1903 H.D., the Harley emblazoned black leather furniture sat in the third corner nearest the door outside. A security guard sat at the front door beside the enclosed black check-in counter. Above him in orange neon was the Bar and Shield, Harley's symbol. After I identified myself, the secretary phoned the magic name I proffered and all of a sudden, I was okay. Wait for security. Sign in this book, wear this security tag while in the building, and turn it in when leaving. Cameras were prohibited. You must agree to random searches at any time. In addition, the legal department requires signing a confidentiality agreement. You are not allowed to discuss anything you see until June 25th. The date was March 18, 1998. Do you have any idea how hard it was not to discuss the Twin Cam Fathead for three whole months while all the people supposedly in the know give opinions about what the Factory was doing? H-D's top engineers taught us over the best part of a week. We have held each individual part in our hands, seen the
