The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios, now in a newly revised & expanded edition. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.

Unlike books currently on the market, this book attempts to satisfy two goals: combine circuits and electronics into a single, unified treatment, and establish a strong connection with the contemporary world of digital systems. It will introduce a new way of looking not only at the treatment of circuits, but also at the treatment of introductory coursework in engineering in general. Using the concept of "abstraction," the book attempts to form a bridge between the world of physics and the world of large computer systems. In particular, it attempts to unify electrical engineering and computer science as the art of creating and exploiting successive abstractions to manage the complexity of building useful electrical systems. Computer systems are simply one type of electrical systems. +Balances circuits theory with practical digital electronics applications. +Illustrates concepts with real devices. +Supports the popular circuits and electronics course on the MIT OpenCourse Ware from which professionals worldwide study this new approach. +Written by two educators well known for their innovative teaching and research and their collaboration with industry. +Focuses on contemporary MOS technology.

An entrepreneur is someone who has a great, innovative idea that identifies the need for the creation of a new business, taking on the financial risk in the hope of profit and driving that business forward in a measured way. This book draws on the stories, experiences and words of iconic business figures from around the globe and across the years - from Andrew Carnegie and Oprah Winfrey to Steve Jobs and Sunil Mittal. Each chapter deals with a specific aspect of entrepreneurship and the lessons they can teach us, such as: - If you want to become big, you need to think big. If you're content for your business to tick over, that's fine. But if you want it to be a world-beater, you need a world-beater's mindset. - Don't forget what makes your business scalable in the first place. - Prepare your company for growing pains. Expansion brings inevitable problems but an entrepreneur should do everything possible to ready their business. - Try to predict what lies ahead - but remember Warren Buffet's wise words: 'Forecasts usually tell us more of the forecaster than of the future'. Each study includes quotations from and about its main subject, along with words of wisdom from other relevant famous names. Informative, educative and thought provoking, *How to Think Like an Entrepreneur* presents the ideas and methods of the business greats, allowing the reader to expand their understanding of what drives and informs successful entrepreneurship.
