'A hymn of love to the world ... A journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise' Elizabeth Gilbert, author of *Eat, Pray, Love* As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*,

Kimmerer brings these two ways of knowledge together. Drawing on her life as an indigenous scientist, a mother, and a woman, Kimmerer shows how other living beings - asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass - offer us gifts and lessons, even if we've forgotten how to hear their voices. In a rich braid of reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of a wider ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

The first book to consider the importance of commercial art and design for Ed Ruscha's work Ed Ruscha (b. 1937) emerged onto the Los Angeles art scene with paintings that incorporated consumer

products, such as Spam and SunMaid raisins. In this revelatory book, Jennifer Quick looks at Ruscha's work through the tools, techniques, and habits of mind of commercial art and design, showing how his training and early work as a commercial artist helped him become an incisive commentator on the presence and role of design in the modern world. The book explores how Ruscha mobilized commercial design techniques of scale, paste-up layout, and perspective as he developed his singular artistic style. Beginning with his formative design education and focusing on the first decade of his career, Quick analyzes previously unseen works from the Ruscha archives alongside his celebrated paintings, prints, and books, demonstrating how Ruscha's engagement with commercial art has been foundational to his practice. Through this insightful lens, Quick affirms Ruscha as a powerful and witty observer of the vast network of imagery that permeates visual culture and offers new perspectives on Pop and conceptual art.

In Ranching, Mining, and the Human Impact of Natural Resource Development, Raymond L. Gold observes and reports on people whose lives have been significantly affected by the industrialization of rural communities in the American West. Such community change research is rarely done, so this classic study is invaluable for its real world groundings applicable to a variety of social science theories. The study evolved out of ethnographic research on Western communities done over a full decade. This was the first work of its kind to examine and account for the rise of local citizens' groups on the sense of being a community. Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in the American West. In this regard it is a contribution to basic social theory, showing clearly the interrelation between small-community and large-society elements of the structure and functioning of community life. No other book brings together the

story of social effects of natural resource development projects in the American West. This book shows how to implement a social policy concerning resource development and public agencies. It is intended for people interested in the environment, American society, rural and urban affairs, social impact assessment, and urban structures generally. It is also aimed at industrial and community planners and natural resource development firms.

Multinational companies transfer managerial practices such as quality management globally. Studies from different perspectives have examined cultural, institutional, and organizational challenges in practice transfer, however, little is known about the micro-processes of intercultural transfer, especially in complex cultural settings as Brazil. Integrating the recontextualization perspective and Scandinavian institutionalist transfer-as-translation approach, this book explores micro-processes of transfer from German MNC to Brazilian subsidiaries from a multiple cultures perspective. Findings show the complementary nature of micro-processes of translation and recontextualization, embedding them into a process model of four stages:

Preparation, translation, recontextualization, and institutionalization. Intercultural transfer can be considered an iterative and multi-level process in which practices diffuse from individuals, to teams, to the organization. The book contributes to international management by cross-fertilizing the two approaches, by highlighting cultural and institutional particularities of the Brazilian context using a culturally sensitive methodology, and by showing the transformative power of managerial practices on organizations and ecosystems.

This textbook describes strategic product and service planning, introducing the concept of innovation. Linear models of product development are presented, and the product concept and system architecture generation are introduced. The responsiveness of the development process to uncertainty and complexity is covered, as well as ways of managing portfolios, programmes and projects. This textbook results from the author's experience of teaching more than 40 years. The methods described in the book have been taught and applied by the students. Examples of concept development projects of products and services carried out by the students are described, many of them revealing great creativity.
