This unique 3 eBook package brings together all the techniques, best practices, and

case studies you need to make sustainability work throughout your supply chain. In *The Lean Sustainable Supply Chain*, Robert Palevich illuminates the business benefits of combining "lean" and "green," offering start-to-finish guidance for redesigning company infrastructure and technologies to achieve these benefits. Through a comprehensive case study, he shows how to manage change, innovation, talent, execution, inventory, warehousing, and transportation; integrate supply chain sustainability into business scorecards; make more effective use of 3PLs, information systems, and much more. He systematically addresses key technical issues ranging from forecasting methodologies and supplier integration to carbon tracking and quantifying lean savings. Next, in *Creating a Sustainable Organization*, Peter Soyka shows how to choose the right sustainability strategies, and then manage and measure them well. Soyka's actionable guide bridges the disparate worlds of the EHS/sustainability professional and the investor/analyst. Discover what the evidence says about linkages between sustainability and value... how to manage key stakeholder relationships influencing corporate response to EHS and social equity issues... how to effectively manage sustainability throughout the business... how to evaluate sustainability posture and performance from the standpoint of external investors and internal management... how to maximize the influence of organizational actors focused on sustainability, and much more. Finally, the *Sustainability in Supply Chain Management Casebook* is the first comprehensive collection of original case studies on building sustainability into the supply chain. Steven Leon covers a wide spectrum of social, economic and environmental issues, as well as new areas such as closed-loop

supply chains. Topics include strategy, implementation, decision making, transportation, supplier relationships, collaboration, lean, continuous improvement, finance/economics, worker safety and rights, procurement, production, delivery, packaging, logistics, reverse logistics, and global supply chains. Each case study is supported with an authoritative introduction, teaching notes, and Q-and-A sections. Whatever your role in the sustainable supply chain, this collection will help you transform its promise into reality. From world-renowned sustainable supply chain experts Robert Palevich, Peter A. Soyka, Stephen M. Leon

Intercultural Transfer of Management Practices of German MNC to Brazil Westview Press

In Ranching, Mining, and the Human Impact of Natural Resource Development, Raymond L. Gold observes and reports on people whose lives have been significantly affected by the industrialization of rural communities in the American West. Such community change research is rarely done, so this classic study is invaluable for its real world groundings applicable to a variety of social science theories. The study evolved out of ethnographic research on Western communities done over a full decade. This was the first work of its kind to examine and account for the rise of local citizens' groups on the sense of being a community. Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in the American West. In this regard it is a contribution to basic social theory, showing clearly the interrelation between small-community and large-society elements of the structure and functioning of community life. No other book brings together the story of social effects of natural resource development projects in the American West. This book shows how to implement a social policy concerning resource development and public agencies. It is intended for people interested in the environment, American society, rural and urban affairs, social impact assessment, and urban structures generally. It is also aimed at industrial and community planners and natural

resource development firms.

'A hymn of love to the world ... A journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise' Elizabeth Gilbert, author of Eat, Pray, Love As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In Braiding Sweetgrass, Kimmerer brings these two ways of knowledge together. Drawing on her life as an indigenous scientist, a mother, and a woman, Kimmerer shows how other living beings - asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass - offer us gifts and lessons, even if we've forgotten how to hear their voices. In a rich braid of reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of a wider ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

Multinational companies transfer managerial practices such as quality management globally. Studies from different perspectives have examined cultural, institutional, and organizational challenges in practice transfer, however, little is known about the micro-processes of intercultural transfer, especially in complex cultural settings as Brazil. Integrating the recontextualization perspective and Scandinavian institutionalist transfer-as-translation approach, this

book explores micro-processes of transfer from German MNC to Brazilian subsidiaries from a multiple cultures perspective. Findings show the complementary nature of micro-processes of translation and recontextualization, embedding them into a process model of four stages: Preparation, translation, recontextualization, and institutionalization. Intercultural transfer can be considered an iterative and multi-level process in which practices diffuse from individuals, to teams, to the organization. The book contributes to international management by cross-fertilizing the two approaches, by highlighting cultural and institutional particularities of the Brazilian context using a culturally sensitive methodology, and by showing the transformative power of managerial practices on organizations and ecosystems.

The first book to consider the importance of commercial art and design for Ed Ruscha's work Ed Ruscha (b. 1937) emerged onto the Los Angeles art scene with paintings that incorporated consumer products, such as Spam and SunMaid raisins. In this revelatory book, Jennifer Quick looks at Ruscha's work through the tools, techniques, and habits of mind of commercial art and design, showing how his training and early work as a commercial artist helped him become an incisive commentator on the presence and role of design in the modern world. The book explores how Ruscha mobilized commercial design techniques of scale, paste-up layout, and perspective as he developed his singular artistic style. Beginning with his formative design education and focusing on the first decade of his career, Quick analyzes previously unseen works from the Ruscha archives alongside his celebrated paintings, prints, and books, demonstrating how Ruscha's engagement with commercial art has been foundational to his practice. Through this insightful lens, Quick affirms Ruscha as a powerful

and witty observer of the vast network of imagery that permeates visual culture and offers new perspectives on Pop and conceptual art.
