This is a short text in linear algebra, intended for a one-term course. In the first chapter, Lang discusses the relation between the geometry and the algebra underlying the subject, and gives concrete examples

---

of the notions which appear later in the book. He then starts with a discussion of linear equations, matrices and Gaussian elimination, and proceeds to discuss vector spaces, linear maps, scalar products, determinants, and eigenvalues. The book contains a large number of exercises, some of the routine computational type, while others are conceptual.

The world has changed.

Everyone keeps reminding marketers and advertisers about

the never ending and accelerating forces of technology disruption, consumer changes, and innovation evolution in the marketing world today. Sounds exciting except for the fact that we're doing absolutely nothing about it. Zero. Simply put, under current operating conditions, the advertising industry will not be able to sustain itself and without taking action, is likely to result in severe to catastrophic outcomes- from financial

underperformance to job loss to even a collapse of the current media ecosystem. The solution? The Marketing Model can be fixed by slashing your ad budget, and investing in the Z.E.R.O.
