Metal-organic frameworks represent a new class of materials that may solve the hydrogen storage problem associated with hydrogen-fueled vehicles. In this first definitive guide to metal-organic framework chemistry, author L. MacGillivray addresses state-of-art developments in this promising technology for alternative fuels.

Providing professors, graduate and undergraduate students, structural chemists, physical chemists, and chemical engineers with a historical perspective, as well as the most up-to-date developments by leading experts, Metal-Organic Frameworks examines structure, symmetry, supramolecular chemistry, surface engineering, metal-organometallic frameworks, properties, and reactions.

Screenwriters and Screenwriting is an innovative, fresh and lively book that is useful for both screenwriting practice and academic study. It is international in scope, with case studies and analyses from the US, the UK, Australia, Japan, Ireland and Denmark. The book presents a distinctive collection of chapters from creative academics and critical practitioners that serve one purpose: to put aspects of screenwriting practice into their relevant contexts. Focusing on how screenplays are written, developed and received, the contributors challenge assumptions of what 'screenwriting studies' might be, and celebrates the role of the screenwriter in the creation of a screenplay. It is intended to be thought provoking and stimulating, with the ultimate aim of inspiring current and future screenwriting practitioners and scholars.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the

basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

Physic Nut, Jatropha Curcas L. Haynes Manuals N. America, Incorporated Explains the science, the function, and most important, the tuning expertise required to get your Holley carburetor to perform its best.
