Offering a behind-the-scenes look into the world of automotive research and development in the

1960s, this engaging narrative traces the birth of Chrysler's alternative "jet" car and reveals the story behind its sudden and mysterious demise.

Relying on extensive research and firsthand accounts from surviving members of the turbine car program—including the metallurgist who created the exotic metals for the engine and the test driver who drove it at Chrysler's proving grounds—this chronicle documents the bold development of an

automobile with a jet turbine engine. In addition to running well on virtually any flammable liquid—including kerosene, vodka, heating oil, and Chanel N°5 perfume—the pioneering engines had one fifth the number of moving parts and required less maintenance than conventional engines. Despite the fleet's amazing performance over millions of miles by test drivers, Chrysler pulled the plug on the project and crushed almost all of the

cars. The reasons behind the surprising end to the jet car fleet are finally explained here.

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this

\$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included

driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
