Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

The saxophone is arguably the most iconic of all instruments, but with its graceful form and soulful tone it's easy to forget that it's still a machine. It's a complicated machine, too, and even a slight fault in the mechanism can affect the way it feels and plays. This innovative manual explains clearly and simply how the mechanism functions and what can be done to maintain it, as well as to improve its performance with professional set-up techniques, with few or no specialist tools. This manual is essential reading for everyone who plays the saxophone.

When considering how well modern cars perform in many areas, it is easy to forget some of the issues motorists had on a regular basis 40+ years ago. Cars needed maintenance regularly: plugs and points had to be replaced on a frequent basis, the expected engine life was 100,000 miles rather than double and triple the expectation that you see today, and an everyday hassle, especially in warm climates, was being the victim of an overheating car. It was not uncommon on a hot day to see cars stuck in traffic, spewing coolant onto the ground with the hoods up in a desperate attempt to cool off. Fast-forward to today, and it's easy to forget that modern cars even have coolant. The temp needle moves to where it is supposed to be and never moves again until you shut the car off. For drivers of vintage cars, this level of reliability is also attainable. In [High-Performance Automotive Cooling Systems](#), author Dr. John Kershaw explains the basics of a cooling system operation, provides an examination of coolant and radiator options, explains how to manage coolant speed through your engine and why it is important, examines how to manage airflow through your radiator, takes a thorough look at cooling fans, and finally uses all this information in the testing and installation of all these components. Muscle cars and hot rod engines today are pushed to the limit with stroker kits and power adders straining the capabilities of your cooling system to extremes never seen before. Whether you are a fan of modern performance cars or a fan of more modern performance in vintage cars, this book will help you build a robust cooling system to match today's horsepower demands and help you keep your cool.

In the history of armoured fighting vehicles, there have been few that have been so successful or so extensively employed as the Panhard AML armoured car. Based on the British Ferret armoured car, the French-built Panhard AML was first used in combat during the war in Algeria in the early 1960s. Thereafter the AML has fought in numerous wars, notably in Africa, up until the present day with ongoing operations against Boko Haram in Nigeria and Chad. It also fought on the side of the Argentinians during the Falklands War in 1982, and the war on ISIS in 2016. Now with an experienced military author, who was given full and exclusive access to an AML armoured car, this is the latest modern armoured fighting vehicle to receive the Haynes treatment. The Panhard Armoured Car Enthusiasts' Manual is fully illustrated with archive photos, technical drawings and detailed photography.
