The story of how the Super Hornet and Growler came into existence is the focus of this new book. The F/A-18E/F has its roots in the late-1980s Hornet 2000 study, which itself evaluated ways to enhance the range, payload, and bring-back capability of the existing F/A-18 Hornet. Through a series of trade-offs imposed by largely limited defense funds, what emerged was a versatile, affordable strike fighter aircraft that has served the Navy well since its fleet introduction in 2002. The Growler has a similar history. Itself an offshoot of the Super Hornet program, the EA-18G brought many of the Super Hornet's attributes - speed, maneuverability, self-defense capability, and advanced systems - into the electronic attack community and is now posed to assume all such missions from the venerable EA-6B Prowler within the next few years. The book draws on interviews with many of the key players in the F/A-18E/F and EA-18G program and on many press reports of the day to tell the story of how these aircraft were designed, developed, and deployed. Moreover, the book provides insights into the problems faced by these key individuals as well as the management methods they used to produce aircraft that have consistently been delivered at or ahead of schedule, under cost, and under weight.

My story is different, but I'm sure every small player that wanted to become a professional basketball player can relate to what I had to go through. I'm 5'7" and there are so many small basketball players that get overlooked because of their size. I want to be the voice for those players. I was blessed by God with the talent and love to be a basketball player. Through God's grace and timing, basketball has shown me parts of the world that I would've never visited and the great support that I received from my family and friends will never be forgotten or taken for granted...dream big, work for it and see what happens! Growing up in the Jennings' household during basketball season was something I loved and respected. Basketball in the morning, basketball in the evening, basketball at night, basketball in the house, basketball in the gyms, basketball at the dunk courts, basketball on television, basketball movies, basketball without a basketball, I just couldn't get enough and then it turned into a memory bank. Memories of family basketball, memories of high school basketball, memories of college basketball, memories of the NBA, memories of European basketball, memories of good games, bad games, great games, and injuries. If the good outweighs the bad you'll be happy to share your story with anyone that asks. You have to understand that a lot of people never gave me a chance. My family believed in me and I believed in myself, and I worked so hard I get chills just thinking about it. The memories don't stop until you stop. I found out very quickly that short basketball players need to be special. Looking back on it, I realized that the short players that I liked were special. Mugsy Boges was 5'3," Spud Webb was 5'7" and could dunk (he won the NBA dunk contest back in the day), Calvin Murphy was a flat out scorer, and the list goes on and on. At this present time there are only 10 basketball players under 6' that have played 3 years or more in the NBA. I felt like I was special because I played basketball on all major levels: high school, college, NBA and European professional basketball. I'm going to take you through a series of events that I believe gave me the opportunity to not only have my basketball dreams come true, but to also be able to make money doing something I love. Have you ever been to a place where you feel at peace with yourself? If you haven't, I hope you find it before your time on this earth is done. My peace is basketball. It doesn't matter what is going on in my life, I can grab a basketball, find a rim and the rim doesn't even have to have nets. I'll forget everything and just play. It's a great feeling. I believe dreams come true. Mine did and yours can too. You just need to be patient, work hard, don't listen to the negative people (haters), and believe in your own abilities. I did. I had to deal with all of those things and it shaped me to be the man that I am today.

Popular Science Haynes Manuals

In celebration of one of science fiction's most beloved franchises, an updated

edition of the acclaimed Ships of the Line hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship H.M.S. Beagle—without weapons—that proved untenable. From the start, Starfleet realized that each vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed Ships of the Line hardcover collection now includes dozens of additional images brought together for the first time in book format—spectacular renderings featured in the highly successful Star Trek: Ships of the Line calendar series. With text by Star Trek's own Michael Okuda, the story of each of these valiant starships now comes to life. TM, [®], & © 2014 CBS Studios, Inc. Gray Lensman Haynes Manuals

This is the definitive concordance to the epic "Lensman" and "Skylark" novels with which the late "Doc" Smith enthralled science fiction readers for so many years. Edward E. Smith stood unchallenged as the inventor and foremost author of science fiction interstellar stories on the grand scale. He was known as the man who opened the Galaxy to science fiction. He wrote The Skylark of Space in 1920, but the vastness of its concepts was so far in advance of the rudimentary science fiction of the time that it was not sold until 1927, to the newly founded Amazing Stories. This comprehensive concordance has entries for characters, places, events, and many other topics in the "Lensman" and "Skylark" novels. The entries range from only a few words for such minor subjects as "X-plosive" to almost six pages for "Kinnison, Kimball." Both scholarly and sprightly, it is intended for those with nostalgic affection for the "space opera" days of science fiction's early youth when intergalactic adventure was brand new. The book includes a bibliography by Al Lewis and black-and-white illustrations by Bjo.

"How did a low-budget British movie about Londoners battling zombies in a pub become a beloved global pop culture phenomenon? You've Got Red on You details the previously untold story of 2004's Shaun of the Dead, the hilarious, terrifying horror-comedy whose fan base continues to grow and grow. After consulting dozens of the people involved in the creation of the film, author Clark Collis reveals how a group of friends overcame seemingly insurmountable odds to make a movie that would take bites out of both the UK and the US box office before ascending to the status of bona fide comedy classic. Featuring in-depth interviews with director Edgar Wright, producer Nira Park, and cast members Simon Pegg, Nick Frost, Kate Ashfield, Bill Nighy, Lucy Davis, and Coldplay singer Chris Martin, the book also

boasts a treasure trove of storyboards, rare behind-the-scenes photos, and commentary from famous fans of the movie, including filmmakers Quentin Tarantino and Eli Roth, Walking Dead executive producer Greg Nicotero, and World War Z author Max Brooks."--Provided by publisher.
