Networks, Labour and Migration among Indian Muslim Artisans provides an ethnography of life, work and migration in a North Indian Muslim-dominated woodworking industry. It traces artisanal connections within the local context, during migration within India, and to the Gulf, examining how woodworkers utilise local and transnational networks, based on identity, religiosity, and affective circulations, to access resources, support and forms of mutuality. However, the book also illustrates how liberalisation, intensifying forms of marginalisation and incorporation into global production networks have led to spatial pressures, fragmentation of artisanal labour, and forms of enclavement that persist despite geographical mobility and connectedness. By working across the dialectic of marginality and connectedness, Thomas Chambers thinks through these complexities and dualities by providing an ethnographic account that shares everyday life with artisans and others in the industry. Descriptive detail is intersected with spatial scales of 'local', 'national' and 'international', with the demands of supply chains and labour markets within India and abroad, with structural conditions, and with forms of change and continuity. Empirically, then, the book provides a detailed account of a specific locale, but also contributes to broader theoretical debates centring on theorisations of margins, borders, connections, networks, embeddedness, neoliberalism, subjectivities, and economic or social flux.

Learn how to rebuild and upgrade your Buick Nailhead with the first book ever dedicated to the subject! In this all-new book from Nailhead racer and veteran engine builder Gary Weldon, you will learn everything you need to know about how to rebuild and upgrade the venerable Buick Nailhead engine. Weldon takes you through each step, including a review of the birth of the Nailhead, the benefits of its unique design, serial and casting number information to source and identify the best project, and a history of the engine in development. Also covered are the processes of rebuilding, including disassembly, inspection, sourcing the best parts, making critical upgrades, reassembly, and break-in. Of course, all the machine shop work is covered, and practical advice on building engines for competition is provided. The Nailhead was a throwback to the early overhead-valve engine design, and that unique design makes it a popular choice for period-correct hot rod projects. In addition, if your torquey Nailhead resides between the fenders of a Buick Special, LeSabre, Invicta, Roadmaster, Riviera, Century, Skylark, Wildcat, or Electra 225, this book will help you keep that old beauty on the road.

One of the first ethnographic studies to explore use of social media in the everyday lives of

people in Tamil Nadu, Social Media in South India provides an understanding of this subject in a region experiencing rapid transformation. The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life. While certain class tensions have emerged in response to this juxtaposition, a study of social media in the region suggests that similarities have also transpired, observed most clearly in the blurring of boundaries between work and life for both the old residents and the new. Venkatraman explores the impact of social media at home, work and school, and analyses the influence of class, caste, age and gender on how, and which, social media platforms are used in different contexts. These factors, he argues, have a significant effect on social media use, suggesting that social media in South India, while seeming to induce societal change, actually remains bound by local traditions and practices.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

In this book, experts discuss whether volatility, uncertainty, complexity and ambiguity (VUCA) represent a challenge or a business opportunity. More intense debates on global climate change, increased turbulence in financial quarters, increased job insecurity and high levels of stress at the workplace are attracting attention in the context of organization behavior and entrepreneurship. Fear and confusion have become part and parcel of business, often undermining trust, cooperation and inspiration. As a response, a new way of organizing self-management has emerged. The book combines practical wisdom from East and West, to develop integrative self-management theory and practice; provides direction to support an integrative mindset, integrative organization and integrative leadership; and presents VUCA as an opportunity and necessity for development and growth, rather than a threat.
