Jeep Cherokee and Comanche automotive repair manual Haynes Publishing The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your résumé, but more important, it will help you get your Mopar back on the road!

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower

with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

Best-selling author David Hough is the anti-bad ass of motorcyclists, a serious down-to-earth master of two- (and three-) wheeled street rods who is interested in the safety and road smarts of his fellow motorcyclists. Mastering the Ride is his follow-up book to one that put him on the map, Proficient Motorcycling, and it goes one better. For motorcyclists ready to take their rides to the next level, Mastering the Ride is an exhilarating course in skills, safety, and common sense. Hough's writing style is straightforward and conversational, never professorial, preachy, or boring. With instructional color photographs and drawings, the book covers improving the rider's skills of speed and passing on superslabs, mountain roads, and city streets; anticipating and handling street and road hazards, from treacherous tar snakes to lane-weaving drivers; and learning the limits of sight distances, executing quick stops at sudden hazards as well as curves. The book devotes two full chapters to the skills involved in mastering cornering, with specific advice about rolling on and off the throttle, shifting, braking, countersteering, body steering and positioning, and cornering lines. In the chapter "Mastering the Art of Conspicuity," Hough recommends riders understand and employ conspicuity, that is understanding how motorcyclists and car drivers see their surroundings and getting others to see you on the road by use of hi-viz clothing, LED lights, and other gear. The key to safety rests in increased situational awareness; the topic of the next chapter; the ability to predict how road events will unfold by thinking through the possibilities way before a potential hazard presents itself. Thanks to Hough's direct and specific instructions to riders for what they need to know, to improve, to avoid, and to do every time they get on their bikes, this chapter and the skills it describes are nothing short of life-saving. In short, Mastering the Ride is a crash course in how not to crash; that is, after all is read and done, what every motorcyclist must avoid for his own life and the lives of others on the road. As Eric Trow, a motorcycle safety journalist and instructor states on the back cover, "Mastering the Ride should be required reading for every road-going motorcyclist and become the companion of any rider serious about advancing his or her road craft." Voni Graves, the record-setting million-mile BMW rider, is a long-time Hough fan who relied on Hough's "wisdom" back in the 1970s when the author was a columnist. "The latest from David brings together his years of experience and his unique analysis to make the case for mastery in a conversational way that makes [Mastering the Ride] impossible to put down. The breadth and depth of the information; is astounding." A section on the aging rider, including ways to compensate for older riders' slower reaction times and readapting their skills, is included in the appendix, as is a travelogue of Hough's road trips to some of his favorite locations. A glossary, resources section, and index complete the book.
