To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer

Narrative's Memoir on Astronomy (al-Tadhkira f ilim al-hay'a) Data Just Right  
A timely revision in this global age, Human Behavior and the Social Environment, Macro Level develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and the impact of these worlds on human behavior. Its major new theme, sustainability, emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? Following the greatest economic upheaval since the Great Depression, how can we envision a sustainable economy that will benefit all the people, not only the wealthy few? Human behavior results from biological, psychological, socio-economic, and cultural forces, but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio-economic and cultural considerations. This significant collaboration seeks to correct this omission by helping students recognize patterns in the family, culture, and value systems in order to create safe and sustainable environments for their future clients. The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice. \* Integrates up-to-date research findings, models, and government statistics \* Enhanced discussions of theory, group dynamics, family, community, and the environment \* Theoretical concepts and practice implications in each chapter \* Highlights the importance of the natural environment and ecology--the "community of the earth"--to human and group behavior \* Sets forth a refined understanding of the role of spirituality--the "community of faith"--in people's lives \* Focuses on evidence-based theory and research \* Teaches from a global, cross-cultural, perspective, highlighting themes of empowerment and social justice \* Features dynamic readings, personal narratives, and photographs that highlight each chapter's topic \* Accompanied by an online instructor's manual with lecture presentations, chapter summaries, key terms, suggested classroom activities, and a test bank with essay and multiple choice questions at [www.oup.com/us/HBSE/](http://www.oup.com/us/HBSE/) Don't miss the companion volume, Human Behavior and the Social Environment, Micro Level, Second Edition, which offers an eye-opening view of how biological, psychological, and cultural forces influence individuals' behavior.

"A sweet, sexy read, featuring a couple that feels both true-to-life and aspirational." Kirkus Review, Starred Review  
American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he's as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn't have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He's finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she'll be gone in a few months... Except now she's determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? Each book in the Patterson's Bluff series is STANDALONE:  
\* The Aussie Next Door \* Her Aussie Holiday

Recording knowledge in a common framework that would make it possible to seamlessly share global knowledge remains an important challenge for researchers. This brief examines several ideas about the representation of knowledge addressing this challenge. A widespread general agreement is followed that states uniform knowledge representation should be achievable by using ontologies populated with concepts. A separate chapter is dedicated to each of the three introduced topics, following a uniform outline: definition, organization, and use. This brief is intended for those who want to get to know the field of knowledge representation quickly, or would like to be up to date with current developments in the field. It is also useful for those dealing with implementation as examples of numerous operational systems are also given. Human Behavior and the Social Environment, Macro Level Oxford University Press

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down

around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

From how the current crisis happened to the role of banks to how money works, this book addresses complex ideas in an easy to understand Q&A format with lively prose. With examples throughout from personal finance issues such as how to negotiate the best price for a car, and should you buy a warranty for a new computer, to big picture questions that affect our national and global economy such as: What is deflation and inflation? How does monetary policy really work? How does a corporation actually go bankrupt?

[Concepts, Ontologies, and Knowledge Representation](#) Academy of Natural Sciences

I was introduced to Tiisi: and his Tadhkira some 19 years ago. That first meeting was neither happy nor auspicious. My graduate student notes from the time indicate a certain level of confusion and frustration; I seem to have had trouble with such words as tadhkir (epicycle), which was not to be found in my standard dictionary, and with the concept of solid-sphere astronomy, which, when found, was pooh-poohed in the standard sources. I had another, even more decisive reaction: boredom. Only the end of the term brought relief, and I was grateful to be on to other, more exciting aspects of the history of science. A few years later, I found myself, thanks to fellowships from Fulbright-Hays and the American Research Center in Egypt, happily immersed in the manuscript collections of Damascus, Aleppo, and Cairo. Though I had intended to work on a topic in the history of mathematics, I was drawn, perhaps inevitably, to a certain type of astronomical writing falling under the rubric of hay'a. At first this fascination was based on sheer numbers; that so many medieval scientists could have written on such a subject must mean something, I told myself. (I was in a sociological mode at the time.

Barrington Moore bequeathed comparativists a problem: how to reconcile his causal claim of "no bourgeoisie, no democracy" with his normative "dream of a free and rational society." In this book, Mark I. Lichbach harmonizes causal methodology and normative democratic theory, illustrating their interrelationship. Using a dialogue among four specific texts, Lichbach advances five constructive themes. First, comparativists should study the causal agency of individuals, groups, and democracies. Second, the three types of collective agency should be paired with an exploration of three corresponding moral dilemmas: ought-is, freedom-power, and democracy-causality. Third, at the center of inquiry, comparativists should place big-P Paradigms and big-M Methodology. Fourth, as they play with research schools, creatively combining prescriptive and descriptive approaches to democratization, they should encourage a mixed-theory and mixed-method field. Finally, comparativists should study pragmatic questions about political power and democratic performance: In building a democratic state, which democracy, under which conditions, is best, and how might it be achieved?

The war is over and blackouts are a thing of the past, except in the village of Melchester, where the local council has refused to sully its streets with unsightly lamps. The night is pitch black, but hardly quiet. Young lovers are rendezvousing, a police constable is helping himself to a few of his neighbor's partridges, and a poet is going to visit his beloved, a new verse on his lips. She will never hear it, sadly, for the young man is stopped along his way — stopped forever, by the tight grip of the garrote. The local constabulary wastes no time reaching out to Scotland Yard, which sends its best man: the easygoing detective-inspector Littlejohn. In Melchester he will find unspeakable secrets — and one citizen whose soul is as dark as the village night.

The Widow Waltz St. Martin's Press

White Cube was pleased to present nineteen new paintings by Damien Hirst. The exhibition was staged at White Cube Mason's Yard and White Cube Hoxton Square. At White Cube Hoxton Square, Hirst presented a group of paintings, which included three triptychs from 2007-09, each depicting crows shot in mid-flight against blue skies, with outspread wings and violent splatters of red paint across their bodies. In the four triptychs on show in the lower ground floor at White Cube Mason's Yard, these crows reappear, as omens of bad news. They often share the space with ghost-like figures, skeletal forms and objects, including chairs, lemons, knives, animal skulls, wine glasses or a scorpion.

While technological advancements have been critical in allowing researchers to obtain more and better quality data about cellular processes and signals, the design and practical application of computational models of genomic regulation continues to be a challenge. *Emerging Research in the Analysis and Modeling of Gene Regulatory Networks* presents a compilation of recent and emerging research topics addressing the design and use of technology in the study and simulation of genomic regulation. Exploring both theoretical and practical topics, this publication is an essential reference source for students, professionals, and researchers working in the fields of genomics, molecular biology, bioinformatics, and drug development.

Comments on Serranoid Fishes with Disjunct Lateral Lines: With the Description of a New One from the Bahamas CRC Press

At its most expansive, the Roman Empire stretched from the British Isles to Egypt; Rome was the ancient world's greatest superpower. *Roman Architecture: A Visual Guide* is an illustrated introduction to the great buildings and engineering marvels of Rome and its empire. Published as a companion volume to Diana E. E. Kleiner's course on Roman Architecture given through Coursera (first offered in January 2014 but based on a class she has long taught at Yale), this enhanced e-book explores not only Rome but also buildings preserved at Pompeii, Herculaneum, Ostia, Tivoli, North Italy, Sicily, France, Spain, Germany, Greece, Turkey, Croatia, Jordan, Lebanon, and North Africa. Beginning with the birth of Rome as an Iron Age village, *Roman Architecture* traces the growth and expansion of the Roman Empire through its cities, which featured civic, religious, commercial, entertainment, and residential districts in the urban setting. A valuable resource for both the student and the traveler, *Roman Architecture* features over 250 photographs and site plans of the most intriguing and consequential buildings in the Roman Empire. These are presented from the fresh perspective of an author who has journeyed to nearly all of the sites, revealing most of them through her own digital images. In addition, this interactive e-book makes learning about these monuments easier than ever, with handy maps and geolocation links that show you just where the monuments are and, if you're traveling, how to get there. Suitable for the classroom and as a guidebook, *Roman Architecture* is a fascinating introduction to some of history's most compelling and influential architecture.
