Offering professional wrestling fans a ringside seat into his adventurous life, WWE Hall of Fame wrestler Jim Duggan recounts for the first time key moments and legendary bouts both inside and outside the ring. Known to millions of enthusiasts as a charismatic patriot with an American flag in his right hand and his signature two-by-four in his left Duggan here reflects on his early life as a student-athlete on the Southern Methodist University football squad. Drafted by the Atlanta Falcons, Duggan shares how an injury-plagued rookie season curtailed his football ambitions and paved the way for a brighter career in professional wrestling. Rising to fame in the Cold War era 1980s, Duggan immediately put himself at odds with anti-American heels and engaged in legendary feuds with some of the most legendary names in the sport, including the Iron Sheik, Nikolai Volkoff, and Andre the Giant. In this who s who of top-tier wrestling, Duggan reveals not only the high points of championship bouts but also the low points that occurred far away from the TV cameras and screaming fans, including his fight against kidney cancer during the prime of his career. With each page peppered with Duggan s charming wit, fans will find much to enjoy and discover about the man they once knew only as Hacksaw. "

It's the ultimate challenge: breaking into the Ivy League. The hack: To get one deadbeat, fully unqualified slacker into the most prestigious school in the country. The crew: Eric Roth -- the good guy, the

voice of reason. Max Kim -- the player who made the bet in the first place. Schwartz -- the kid genius already on the inside...of Harvard, that is. Lexi -- the beauty-queen valedictorian who insists on getting in the game. The plan: Use only the most undetectable schemes and techno-brilliant skills. Don't break the Hacker's Code. Don't get distracted. Don't get caught. Take down someone who deserves it. The stakes: A lot higher than they think. They've got the players, the plot, and soon -- the prize. It's go time.

Gifted Tongues Packt Publishing Ltd Hadoop Beginner's GuidePackt Publishing Ltd Hacking Exposed Windows 2000 Syngress Press Distinguished educators Arthur L. Costa and Bena Kallick present this collection of stories by educators around the world who have successfully implemented the habits in their day-to-day teaching in K-12 classrooms. The collective wisdom and experience of these thoughtful practitioners provide readers with insight into the transdisciplinary nature of the 16 Habits of Mind—intelligent behaviors that lead to success in school and the larger world—as well as model lessons and suggestions for weaving the habits into daily instruction in language arts, music, physical education, social studies, math, foreign language, and other content areas. Readers will come to understand that, far from an "add-on" to the curriculum, the habits are an essential element for helping students at all grade levels successfully deal with the challenges they face in school and beyond. As in all their books on the Habits of Mind, Costa and Kallick have a broad and worthwhile goal in mind. As they say in the concluding chapter of this volume, "If we want a future that is much more thoughtful, vastly more cooperative, greatly more compassionate, and a whole lot more loving, then we have to invent it.

That future is in our homes, schools, and classrooms today. The Habits of Mind are the tools we all can use to invent our desired vision of the future."

Every family has relational habits—both positive and negative—that have been passed down from generation to generation. Experienced counselor Beverly Hubble Tauke cites real-life stories and suggests specific "transforming practices" to change family patterns. By putting an end to the cycle of negativity, families can find the joy that God intended for them and enjoy healthy relationships for generations to come. This is a repackage with new title (previous title, [Overcoming the] Sins of the Family, 2004).

The Globus Toolkit is a key technology in Grid Computing, the exciting new computing paradigm that allows users to share processing power, data, storage, and other computing resources across institutional and geographic boundaries. Globus Toolkit 4: Programming Java Services provides an introduction to the latest version of this widely acclaimed toolkit. Based on the popular web-based The Globus Toolkit 4 Programmer's Tutorial, this book far surpasses that document, providing greater detail, quick reference appendices, and many additional examples. If you're making the leap into Grid Computing using the Globus Toolkit, you'll want Globus Toolkit 4: Programming Java Services at your side as you take your first steps. Written for newcomers to

Globus Toolkit, but filled with useful information for experienced users. Clearly situates Globus application development within the context of Web Services and evolving Grid standards. Provides detailed coverage of Web Services programming with the Globus Toolkit's Java WS Core component. Covers basic aspects of developing secure services using the Grid Security Infrastructure (GSI). Uses simple, didactic examples throughout the book, but also includes a more elaborate example, the FileBuy application, that showcases common design patterns found in Globus applications. Concludes with useful reference appendices. **The Company Daughters** ABC-CLIO Managing a software development project is a complex process. There are lots of deliverables to produce, standards and procedures to observe, plans and budgets to meet, and different people to manage. Project management doesn't just start and end with designing and building the system. Once you've specified, designed and built (or bought) the system it still needs to be properly tested, documented and settled into the live environment. This can seem like a maze to the inexperienced project manager, or even to the experienced project manager unused to a particular environment. A Hacker's Guide to Project Management acts as a guide through this maze. It's aimed specifically at those managing a project or leading a team for the first time, but it will also help more experienced managers who are either new to software development, or dealing with a new part of the software life-cycle. This book: describes the process of software development, how projects can fail and how to avoid those failures outlines the key skills of a good project

manager, and provides practical advice on how to gain and deploy those skills takes the reader step-by-step through the main stages of the project, explaining what must be done, and what must be avoided at each stage suggests what to do if things start to go wrong! The book will also be useful to designers and architects, describing important design techniques, and discussing the important discipline of Software Architecture. This new edition: has been fully revised and updated to reflect current best practices in software development includes a range of different life-cycle models and new design techniques now uses the Unified Modelling Language throughout

Hackney Child McGraw-Hill Companies The powerful, refreshingly honest, first-hand account of a childhood spent in the Care system. At the age of nine, Hope Daniels walked into Stoke Newington Police Station with her little brothers and asked to be taken into care. Home life was intolerable: both of Hope's parents were alcoholics and her mum was a prostitute. The year was 1983. As London emerged into a new era of wealth and opportunity, the Daniels children lived in desperate poverty, neglected and barely nourished. Hounded by vigilante neighbours and vulnerable to the drunken behaviour of her parents' friends, Hope had to draw on her inner strength. Hackney Child is Hope's gripping story of physical and emotional survival – and the lifeline given to her by the support of professionals working in the care system. Despite all the challenges she faced, Hope never lost compassion for her parents. Her experiences make essential reading and show that, with the right help, the least fortunate children have the potential not only to recover but to thrive. Lucius is a young Centurion in the time of Hadrian, serving at Trimontium, modern-day Melrose in southern Scotland. Trista is a Roman patrician girl, living in Gaul. She is orphaned and becomes a vagrant when her parents are killed by traitors plotting to overthrow the emperor. Following the death of his wife, Lucius becomes an imperial agent, operating beyond the borders of the Empire as a trader, seeking signs of invasion. He meets Trista who is under threat of assassination. The story follows their flight across Gaul, pursued by evil forces, to the German forests in a race to avert invasion and the death of the emperor.
