By the late 1960s the Beetle had enjoyed over twenty years of continuous production, dominated its home market and conquered export markets all around the world. Volkswagen's policy of constant improvement and refinement to a single model appeared to be vindicated. However, 1968 saw the death of Heinz Nordoff, who was the driving force behind the Beetle's evolution and continued success.

In many ways, this was a watershed year; the 1968 model introduced many significant changes to the car, and it became inevitable that a replacement for the venerable Beetle would have to be developed. This book charts the closing years of the Beetle's production life in Germany; from the revamped 1968 model to the 1302, 1303, the Cabriolet, and the various Specials produced later. Topics covered include: - Brief history , 1935-1967 - Full history, 1968-1980 - Comprehensive production survey - Specification and detail changes by model year [August 1967 to January 1980] - Engine options - Factory fitted optional equipment - Paint and trim colors - Special and export editions - The Karmann Cabriolet
