**How to Rebuild & Modify GM Turbo 400 Transmissions** Motor Auto Repair Manual.

The Ford 8.8- and 9-inch rear differentials are two of the most popular and best-performing differentials on the market. While the 8.8-inch differential is commonly used in late-model Mustangs, the 9-inch is the more popular and arguably the most dominant high-performance differential for muscle cars, hot rods, custom vehicles, and race cars. Built from 1957 to 1986, the 9-inch Ford differential is used in a huge range of high-performance Ford and non-Ford vehicles because of its rugged construction, easy-to-set-up design, and large aftermarket support. The 9-inch differential effectively transmits power to the ground for many classic Fords

and hot rods of all types, but it is the choice of many GM muscle car owners and racers as well. These differentials have been used extensively and proven their mettle in racing and high-performance applications. The Ford 8.8- and 9-inch must be rebuilt after extensive use and need a variety of different ratios for top performance and special applications. This Workbench book provides detailed step-by-step photos and information for rebuilding the differentials with the best equipment, installing the gear sets, and converting to Posi-Traction for a variety of applications. It describes how to disassemble the rear end, identify worn ring and pinion gears, other damage or wear, and shows step-by-step rebuilding of the differential. It also explains how to select the right differential hardware, bearings, seals, and other parts, as well as how to set ring and pinion backlash so that the rear end operates at peak efficiency. Aftermarket 9-inch performance differentials from manufacturers including Currie, Moser and Strange are reviewed and you learn how to rebuild and set up these high-performance aftermarket differentials. In addition, this book provides a comprehensive identification chart to ensure readers properly identify the model and specifics of the 9-inch differential. Chapters include axle identification, inspection, and purchasing axles for rebuilding; differential tear down; ring and pinion gear removal; inspection and reassembly; drive axle choices; and more.

Here is some BAD news first; trying to make money on eBay selling Brand Name products is NOT the way to make money! Here's why, even if you could manage to locate a source of genuine products you would have to spend \$1,000's just to get enough discount to make even a small profit. You see there are just too many sellers competing for the same business. Brand name products are just too expensive to buy, the margins are slim and there is too much competition. There must be an easier way to make money? Well there is, the market for non branded and private label products on eBay is huge and this approach works in any market, it costs a tiny

amount to set up and the profit margins are outrageous and it is much easier than most people would believe. In this comprehensive book I show you step by step how to build your own eBay empire selling Private Label and Non Branded stock. The profit margins on private label products and non branded products are massive. The Advantage Of Private Label Products Are:

- No one can directly compete with you as you own the brand.
- Your customers will know where you sourced product from.
- Private labelling is widespread across many industry sectors as is none branded products.
- Small minimum orders allow us to test products for a tiny risk.
- You can build an entire business using Private Label & Non Branded Products
- Compete with household name products at a fraction of the price of stocking branded items.
- You are almost always dealing directly with the manufacturer so no wholesalers cut. As no one is selling exactly the same product as yourself and no one will know where you bought it from, you can sell at your own price. I even provide a list of Private Label Suppliers and Manufacturers who stock a massive range of product that you can sell in multiple niche markets these are the exact same sources I use in my eBay businesses. This is your COMPLETE blueprint to building your own profitable eBay business on a shoestring and making outrageous profits.
