The use of MATLAB is ubiquitous in the scientific and engineering communities today, and justifiably so. Simple programming, rich graphic facilities, built-in functions, and extensive toolboxes offer users the power and flexibility they need to solve the complex analytical problems inherent in modern technologies. The ability to use MATLAB effectively has become practically a prerequisite to success for engineering professionals. Like its best-selling predecessor, *Electronics and Circuit Analysis Using MATLAB*, Second Edition helps build that proficiency. It provides an easy, practical introduction to MATLAB and clearly demonstrates its use in solving a wide range of electronics and circuit analysis problems. This edition reflects recent MATLAB enhancements, includes new material, and provides even more examples

and exercises. New in the Second Edition: Thorough revisions to the first three chapters that incorporate additional MATLAB functions and bring the material up to date with recent changes to MATLAB A new chapter on electronic data analysis Many more exercises and solved examples New sections added to the chapters on two-port networks, Fourier analysis, and semiconductor physics MATLAB m-files available for download Whether you are a student or professional engineer or technician, *Electronics and Circuit Analysis Using MATLAB, Second Edition* will serve you well. It offers not only an outstanding introduction to MATLAB, but also forms a guide to using MATLAB for your specific purposes: to explore the characteristics of semiconductor devices and to design and analyze electrical and electronic circuits and systems.

The author, Professor Z. V. Togan, staged a counterrevolution, who first interacted and bargained with Lenin, Stalin, Trotsky and the rest of the Soviet and Bolshevik luminaries of his own time for Baskurdistan and Turkistan. It can be read profitably in the context of anti-colonialism, Sub-altern studies, Russian and Soviet studies.

Merezhkovsky's bold claim that "all Russian literature is, to a certain degree, a struggle with the temptation of demonism" is undoubtedly justified. And yet, despite its evident centrality to Russian culture, the unique and fascinating phenomenon of Russian literary demonism has so far received little critical attention. This substantial collection

fills the gap. A comprehensive analytical introduction by the editor is followed by a series of fourteen essays, written by eminent scholars in their fields. The first part explores the main shaping contexts of literary demonism: the Russian Orthodox and folk tradition, the demonization of historical figures, and views of art as intrinsically demonic. The second part traces the development of a literary tradition of demonism in the works of authors ranging from Pushkin and Lermontov, Gogol and Dostoevsky, through to the poets and prose writers of modernism (including Blok, Akhmatova, Bely, Sologub, Rozanov, Zamiatin), and through to the end of the 20th century.

**DOE Fundamentals Handbook - Electrical Science (Volume 4 of 4)** Don Mills, Ont. : Addison-Wesley

Abi Talib, son-in-law and cousin of the Prophet Muhammad, first Shi'i imam and fourth caliph, is a monumental figure within the Islamic tradition. But despite the immense importance of Ali, there is a dearth of literature in Western languages about his life and thought. This book - the first serious engagement in English with the intellectual principles underpinning his teachings - is therefore a welcome and valuable addition to the sources available. It consists of three parts. Part one introduces the person of Ali in a general manner, and focuses particularly on the spiritual and ethical content of his teachings. Part two evaluates Ali's 'sacred conception of justice'. Part three addresses the theme of spiritual realization through the remembrance of God, the central mystical practice of the Sufis. Justice and Remembrance will be of great value to students and scholars of Islamic thought, as well as to those interested in the relationship between spirituality and ethics.

The Electrical Science Fundamentals Handbook was developed to assist nuclear facility operating contractors provide operators, maintenance personnel, and the technical staff with the necessary fundamentals training to ensure a basic understanding of electrical theory, terminology, and application. The handbook includes information on alternating current (AC) and direct current (DC) theory,

circuits, motors, and generators; AC power and reactive components; batteries; AC and DC voltage regulators; transformers; and electrical test instruments and measuring devices. This information will provide personnel with a foundation for understanding the basic operation of various types of DOE nuclear facility electrical equipment.

This forum of current discussions of ethics and aesthetics addresses a cross-section of disciplines including literary theory, philosophy, women's studies, postcolonial theory, art history, Holocaust studies, theology, and others. Contributors, ranging from philosophers and literary critics to practicing artists and art curators, answer such questions as: In the age of the collapse of metaphysics, what is the relation between philosophical reflection and art? If we question the privilege accorded to the aesthetic, can ethics alone offer a solution to the crisis of representation? Is it possible and ethically viable to represent the other in speech and image? What happens at the conjunction of aesthetics and politics? Can one speak of aesthetic configurations of the space of community? Are the concepts of ethics and aesthetics gendered and repressive of sexual difference? Considering the many works that consider either ethics or aesthetics almost exclusively within the confines of particular disciplines, this collection crosses the boundaries and continues the debate outside the rigid parameters of specialized discourses.

Dostoevsky and Romantic Realism is Donald Fanger's groundbreaking study of the art of Dostoevsky and the literary and historical context in which it was created. Through detailed analyses of the work of Balzac, Dickens, and Gogol, Fanger identifies romantic realism, the transformative fusion of two generic categories, as a powerful imaginary response to the great modern city. This fusion reaches its aesthetic and metaphysical climax in Dostoevsky, whose vision culminating in *Crime and Punishment* is seen by

---

Fanger as the final synthesis of romantic realism.

The volume focuses on body part terms as the vehicle of embodied cognition and conceptualization. It explores the relationship between universal embodiment, language-specific cultural models and linguistic usage practices. The chapters of the volume add to the previous research in a novel way. The presentation of original data from previously undescribed languages spoken by small communities in Africa and South America allows to discover unknown aspects of embodiment and to propose new interpretations. Well-known languages are analyzed from a new perspective relying on the benefits of linguistic corpora. Contrastive and theoretically oriented studies help to pinpoint similarities and differences among languages, as well as tendencies in conceptualization patterns and semantic development of the lexis of body part terms. The volume contributes to the field of linguistics, but also to cognitive science, anthropology and cultural studies.

Living and Dying with Grace is a book of aphoristic Sufi teachings on how to make one's way in the world—especially on how to bring spiritual insight to the affairs of daily life. Sufism, the mystical branch of Islam, contains a vast body of knowledge concerning the inner development of the complete human being. Among the greatest of Sufi masters, Hadrat 'Alî (598-661 CE), cousin and son-in-law of the Prophet Muhammad, is regarded as a paragon of compassion and virtue and a master of both exoteric and esoteric knowledge. He was not only a great warrior, statesman, and scholar, but also a devoted husband and father. Success in this life, 'Alî teaches, is bestowed on those who maintain generosity, intelligence, perseverance, integrity, and calm reflection. As for success in the hereafter, 'Alî says, "God, the Glorified, admits to Paradise anyone, at will, for truthfulness of intention and goodness of innermost thoughts." This book contains four hundred of Hadrat 'Alî's teachings, showing how people can use the everyday realities of their lives to cultivate wisdom and well-being, both temporal and eternal, offering a path to living and dying with grace.
